DRAFT

Executive Summary

ES-05 Executive Summary - 24 CFR 91.200(c), 91.220(b)

1. Introduction

The City of Oceanside has a population of almost 175,000 according to the 2020 Census and around 42-square-miles, located about 35 miles north of the City of San Diego, and just 80 miles south of Los Angeles. Bordering the coastline and Camp Pendleton, it has a strong military history, strong connection to the railroads, and has been attracting visitors from all over southern California. Oceanside is the most diverse jurisdiction on the San Diego region. Oceanside residents are ethnically/racially diverse and have varying levels of disposable income. This document-the City of Oceanside's Five-year Consolidated Plan for Fiscal Years 2025-29 (Consolidated Plan) – provides the vision, goals, and plan for allocating federal housing and community development funds granted to the City by the U.S. Department of Housing and Urban Development (HUD). The Consolidated Plan is the City of Oceanside's Strategic Plan for the investment of annual allocations of Community Development Block Grant (CDBG) and Home Investment Partnerships (HOME) funds. These grant programs are consistent with HUD's national strategy to provide decent housing opportunities, a suitable living environment and economic opportunities—particularly for low- and moderate-income people.

In consideration of finite grant resources, the Strategic Plan within this Consolidated Plan outlines the areas and population segments with the greatest level of need for a particular program or activity and intends to invest grant resources in high leverage opportunities where data suggests that the City will be able to maximize the impact of every dollar. The Strategic Plan identifies the City's priority needs, including the rationale for establishing allocation priorities and specific measurable goals to be addressed during the five year period covered by the Consolidated Plan through activities to be implemented as part of the five Annual Action Plans using CDBG and HOME funds.

This Consolidated Plan also contains a Needs Assessment and Market Analysis that provide insight into the different levels of need in the community and the market in which grant-funded programs will be implemented. The Needs Assessment incorporates national data from the 2016-2020 American Community Survey (ACS) 5-Year Estimates and the 2016-2020 Comprehensive Housing Affordability Strategy (CHAS) data, in addition to HUD program, State of California, and local/ regional data sets.

Community Development Block Grant (CDBG)

The Housing and Community Development Act of 1974 created the CDBG Program. The primary objective of the CDBG program is the development of viable urban communities by providing decent

housing, a suitable living environment, and expanding economic opportunities, principally for persons of low- and moderate-income. CDBG primarily funds community and economic development activities. Examples of eligible activities include: building and rehabilitating community centers and nonprofit facilities, improving public infrastructure such as sidewalks and lighting and roads, supporting skill development and job acquisition for workers, and providing direct services to eligible individuals. CDBG funds can be used for some housing activities including home rehabilitation, accessibility improvements to accommodate persons with disabilities, and down payment assistance for homebuying as well as emergency and disaster response assistance. The CDBG regulations require that each activity meet one of the following national objectives:

- Benefit low- and moderate-income persons;
- Aid in the prevention or elimination of slums and blight; or
- Meet other community development needs having a particular urgency.

Each year, the City certifies with the submission of its Annual Action Plan that it has given maximum feasible priority to activities, which meet the first and second objectives above. Additionally, the City certifies that no less than 70 percent of the CDBG funds received, over a three-year certification period, will be designed to benefit low- and moderate-income persons.

HOME Investment Partnerships (HOME) Program

The Cranston-Gonzalez National Affordable Housing Act created the HOME program to give states and local governments a flexible funding source to use – often in partnership with local nonprofit groups – to fund a wide range of activities including building, buying, and/or rehabilitating affordable housing for rent or homeownership or providing direct rental assistance to low-income people. HOME is a federal block grant to local governments with the sole purpose of creating affordable housing opportunities for low-income households. HOME funds are used for building, acquiring, and rehabilitating affordable housing for rent and homeownership. HOME funds can also be used for assistance to ensure that households remain in their housing.

2. Summary of the objectives and outcomes identified in the Plan Needs Assessment Overview

HUD's Community Planning and Development (CPD) Outcome Performance Measurement Framework classifies objectives in three categories: decent housing, a suitable living environment, and economic opportunity. Based on the Needs Assessment and Market Analysis, the Strategic Plan identifies six high priority needs to be addressed through the implementation of activities aligned with six Strategic Plan goals.

Consistent with HUD's national goals for HUD CPD programs to provide decent housing opportunities, maintain a suitable living environment and expand economic opportunities for low- and moderate-

income residents, the priority needs listed above will be addressed over the next five years through the implementation of HUD funded activities aligned with measurable Strategic Plan goals.

The greatest housing and community development needs in Oceanside identified through the Consolidated Plan research include:

- Rising housing costs – particularly households living on fixed income or with limited ability to work;
- Housing instability – significant number of oceanside households pay more for their housing than they can afford and are more vulnerable to eviction and foreclosure; and
- Homelessness – individuals and families most vulnerable to homelessness include those with children, survivors of domestic violence, veterans, and those with no or limited economic safety nets.

3. Evaluation of past performance

The investment of HUD resources during the 2020-2024 Program Years had widespread impact in Oceanside, from assistance to individuals and families, to improvements to the built environment. During Program Year 2019, the global coronavirus pandemic struck and in 2020, Congress passed the Coronavirus Aid, Relief, and Economic Security Act (CARES). The City received \$2,023,189 in CARES funds to prevent, prepare for, and respond to the virus in the Oceanside community. The World Health Organization, based on evidence, has ended pandemic status and the national public health emergency has ended.

During the pandemic the city utilized CARES funding to prevent and respond to community impacts during the crisis. Some of the outcomes were:

- Assisted 175 individuals with Hotel/Motel vouchers
- Assisted 1,485 individuals with food distributions
- Assisted 87 households emergency rental/utility assistance

Together with other federal, state, and local investments, HUD resources allowed the City of Oceanside and its partners to provide assistance to low and moderate-income people through community and supportive services, community facilities and infrastructure, rehabilitation and homelessness during the last five years. The City continues to effectively implement its activities and align projects and programs with the City's overall strategies and goals. A full review of past performance is available in the Consolidated Annual Performance and Evaluation Reports (CAPERs) that can be accessed through the City's website at

The investment of HUD resources during the 2020-2024 program years was a catalyst for positive change in the community. Together with other federal, state and local investments, HUD resources allowed the City and its partners to:

- Complete development and lease-up pf the 59 unit of permanent supportive housing Greenbrier Village

- Provide rehabilitation loans and grants to homeowners
- Support targeted public service activities for youth, seniors and other at-risk populations
- Provide fair housing information and assistance to Oceanside residents
- Addressed public facilities, infrastructure and park playground needs in communities that serve low-and moderate-income families

4. Summary of citizen participation process and consultation process

The Consolidated Plan regulations at 24 CFR Part 91 provide the citizen participation and consultation requirements for the development of the Consolidated Plan. Chief among those requirements is the need to consult with the Continuum of Care (CoC) to address homelessness, Public Housing Authorities (PHA), business leaders, civic leaders, and public or private agencies that address housing, health, social service, victim services, employment, or education needs of low-income individuals and families, Homeless individuals and families, youth and/or other persons with special needs. Information supplied by these community stakeholders, together with objective data resulted in a well-informed planning document that reflects the housing, community and economic development needs and priorities for the City of Oceanside over the next five years. Together with the analytic capabilities of the eCon Plan Suite, these requirements created the conditions necessary to implement a collaborative, data-driven and place-based planning process that includes a robust level of citizen participation and consultation.

The City adopted a new Citizen Participation Plan in September 2017 that reflects regulatory changes and process improvements. In accordance with the City's adopted Citizen Participation Plan, the City facilitated citizen participation through surveys, community meetings and public hearings. Efforts were made to encourage participation by low- and moderate-income persons, particularly those living in slum and blighted areas and in areas where HUD funds are proposed to be used, and by residents of predominantly low- and moderate-income neighborhoods. The City also made efforts to encourage the participation of minorities and non-English speaking persons, as well as persons with disabilities. The consultation process included representatives of the CoC, PHA, and other specified groups who completed surveys, provided local data and assisted the City to ensure practical coordination of strategies to maximize impact and to avoid duplication of effort.

5. Summary of public comments

To be determined (TBD)

6. Summary of comments or views not accepted and the reasons for not accepting them

The City accepted all input provided throughout the Citizen Participation process.

7. Summary

Analysis of American Community Survey 2016-2020 "ACS" and Comprehensive Housing Affordability Strategy "CHAS" data, review of local plans, consultation with the community through the Community

Needs Survey, public meetings, stakeholder roundtable, and interdepartmental meetings revealed seven high priority needs to be addressed through the investment of an anticipated range between \$6.5 million to \$9 million of CDBG and HOME funds over the five-year period of the Consolidated Plan. The investment of CDBG and HOME funds in eligible activities shall be guided principally by the five goals of the Strategic Plan. Activities must conform to one of the Strategic Plan strategies and the associated action-oriented, measurable goals to receive consideration for CDBG or HOME funding.

DRAFT

The Process

PR-05 Lead & Responsible Agencies 24 CFR 91.200(b)

1. Describe agency/entity responsible for preparing the Consolidated Plan and those responsible for administration of each grant program and funding source

The following are the agencies/entities responsible for preparing the Consolidated Plan and those responsible for administration of each grant program and funding source.

Agency Role	Name	Department/Agency
CDBG Administrator	OCEANSIDE	Neighborhood Services Department
HOME Administrator	OCEANSIDE	Neighborhood Services Department

Table 1 – Responsible Agencies

Consolidated Plan Public Contact Information

Cecilia Barandiaran, Management Analyst
 HUD Grant Programs
 City of Oceanside
 Housing & Neighborhood Services
 300 N. Coast Highway
 Oceanside, CA 92054
Cbarandiaran#@oceansideca.org
 (760) 435-3385

Narrative

The Housing & Neighborhood Services Department of the City of Oceanside is the lead agency responsible for the administration of the CDBG and HOME programs, and projects. Policy and funding approvals are decided by the City Council, which consists of the Mayor, who is elected at-large and four City Council Members from each of four council districts. Decisions regarding implementation of activities within the Consolidated Plan are based on staff recommendations and input from the residents.

In the development of this Consolidated Plan, the City implemented a comprehensive citizen participation and consultation process and conducted a needs assessment and market analysis to identify levels of relative need regarding affordable housing, homelessness, special needs, and community development. This information was gathered through consultation with stakeholders and community meetings, review of demographic and economic data, and housing market analysis.

In the implementation of the 2025-2029 Consolidated Plan and each of the five Annual Action Plans, Housing Division staff shall be responsible for all grants planning, management, and monitoring duties necessary to comply with HUD regulations and City policy.

DRAFT

PR-10 Consultation – 91.100, 91.110, 91.200(b), 91.300(b), 91.215(I) and 91.315(I)

1. Introduction

The City of Oceanside consulted with representatives from multiple agencies, groups, and organizations involved in the development of affordable housing, creation of job opportunities for low- and moderate-income residents, and/or provision of services to children, elderly persons, persons with disabilities, persons with HIV/AIDS and their families, and homeless persons. To facilitate this consultation, the City solicited feedback through the following methods:

- Community Needs Survey (web-based and paper surveys)
- Individual stakeholder consultations
- Community meetings
- Public hearings
- 30-day public comment period
- Receipt of written comments or oral comments

The input received from these consultations helped establish and inform the objectives and goals described in the Strategic Plan.

Provide a concise summary of the jurisdiction’s activities to enhance coordination between public and assisted housing providers and private and governmental health, mental health and service agencies (91.215(I)).

The City of Oceanside has implemented various coordinated activities to strengthen partnerships between public and assisted housing providers, private service organizations, and governmental health and mental health agencies. These coordinated efforts aim to improve housing stability, enhance supportive services, and better address the comprehensive needs of individuals and families experiencing or at risk of homelessness. Through HUD CPD programs, the City of Oceanside works closely with a range of housing, social service, health and other providers operating in the City and San Diego County. The City invites active participation and input from stakeholders each year as part of the Action Plan development process as well as to reflect on accomplishments and outcomes through the development of the CAPER. As part of this Consolidated Plan process, the City of Oceanside reached out directly to a number of agencies and stakeholders to gather input on priority housing and community development needs. The City also invited stakeholders to participate in the Community Survey to gather input on community needs and conditions.

Additionally, the City facilitated 14 different presentations and feedback sessions at locations throughout the City and associated with different organizations and commissions and at locations where current social services and programs are conducted. Outreach was made to various organizations and agencies including:

- Nonprofit services providers,
- Affordable and market rate housing developers,
- Housing advocates,
- Public agencies (such as the school district and Public Housing Authority)
- Economic development and employment organizations
- Community and neighborhood groups, and
- Neighboring cities and communities.

The most recent example of successful coordination of activities is the development of Greenbrier Village, a permanent supportive housing (PSH) community in partnership with National CORE and the San Diego Community Housing Corporation (SDCHC). Greenbrier Village offers 60 affordable studio and one-bedroom apartments. Of these, 50 units are specifically designated for individuals experiencing homelessness, including targeted units for veterans and youth who are aging out of foster care. The remaining units are reserved for individuals and families at risk of homelessness.

The City of Oceanside's coordinated approach includes collaboration with both private and governmental health providers to ensure residents have access to comprehensive care. The Hope through Housing Foundation, Interfaith Community Services, San Diego County Behavioral Health Services, and the U.S. Department of Veterans Affairs provide on-site supportive services at Greenbrier Village. These services include:

- Mental and behavioral health care
- Physical health services
- Employment development programs
- Social connectedness initiatives to reduce isolation

The City further recognizes the importance of continued coordination and alignment during the upcoming five-year planning period with these organizations and agencies. The City will strengthen relationships and alignment among these organizations in the implementation of projects using CDBG and HOME funds.

Describe coordination with the Continuum of Care and efforts to address the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans, and unaccompanied youth) and persons at risk of homelessness

The City of Oceanside actively participates in the San Diego Regional Task Force on the Homeless (Countywide coordinating agency for the Continuum of Care (CoC)) and the Alliance for Regional Solutions (8 city collaborative of North County communities and nonprofits). The CoC is comprised of a network of public, private, faith-based, for-profit, and nonprofit service providers who utilize several federal, state and local resources in providing services for homeless persons. Through these organizations, Oceanside coordinates with regional partners to understand the scale and breadth of homelessness in the region and Oceanside and to collaborate to identify effective regional solutions to best support the needs of homeless persons and households and

to provide proactive assistance to persons at risk of homelessness. The nonprofit and faith-based community plays a key role in the current CoC system. Hundreds of agencies throughout the County provide programs ranging from feeding the homeless on the street to creating permanent supportive housing. These services are available to homeless families with children as well as single men and women. The nonprofit and faith-based community also serves special needs populations, such as victims of domestic violence, veterans, persons with disabilities and unaccompanied youth.

The City of Oceanside works closely with the Regional Task Force on Homelessness (RTFH), the lead agency for the San Diego Continuum of Care (CoC), to implement comprehensive strategies to address the needs and gaps of homelessness. This coordination focuses on serving chronically homeless individuals and families, families with children, veterans, unaccompanied youth, and those at risk of homelessness. The City has developed effective programs prioritizing long-term solutions and immediate intervention services through regional partnerships, targeted funding, and data-driven approaches. The City of Oceanside actively participates in the CoC's regional initiatives, aligning local efforts with the broader goals outlined in the Regional Community Action Plan to Prevent and End Homelessness. Key initiatives funded through the CoC include:

- **Diversion Programs:** In partnership with Interfaith Community Services (ICS), the City operates a diversion program to prevent homelessness through housing navigation, case management, and connection to supportive services. These programs assist individuals in stabilizing their housing situations before they become chronically homeless.
- **Safe Parking Program:** Operated by Dreams for Change, this program provides individuals living in vehicles with a secure place to park and access to wraparound services, including employment support, housing referrals, and health services.
- **Resolution Strategies Fund:** This flexible funding stream helps address immediate financial barriers, such as rental application fees, transportation costs, and temporary lodging, supporting individuals and families at risk of homelessness.
- **Encampment Resolution Funding (ERF) Program:** Focuses on resolving high-risk encampments along the SR-78 Caltrans Right of Way and Buena Vista Creek, areas prone to flooding and other hazards. The ERF Program's goal is to transition individuals from encampments into permanent housing through coordinated outreach, comprehensive case management, and multidisciplinary teams addressing physical and behavioral health needs.

By-Name List (BNL) Initiative:

- The BNL provides a real-time, comprehensive tracking system that identifies individuals experiencing homelessness, ensuring targeted interventions based on individual needs rather than location. Carlsbad's successful BNL is a model that the City of Oceanside is working on replicating, enhancing regional data-sharing and service coordination.

Describe consultation with the Continuum(s) of Care that serves the jurisdiction's area in determining how to allocate ESG funds, develop performance standards and evaluate outcomes, and develop funding, policies and procedures for the administration of HMIS

Although the City of Oceanside does not directly receive Emergency Solutions Grant (ESG) funds, it participates in the CoC's funding discussions to advocate for regional strategies that support services for vulnerable populations, including chronically homeless individuals, veterans, families with children, unaccompanied youth, and those at risk of homelessness. By engaging in the CoC's planning sessions and funding workshops, the City ensures that local needs and priorities are represented in regional funding allocations.

The City also works closely with the CoC to develop performance standards that guide local programs toward improved outcomes. These standards focus on reducing the length of homelessness, increasing permanent housing placements, and enhancing service engagement. Oceanside utilizes data from the HMIS and the By-Name List (BNL) to track progress and evaluate the effectiveness of local programs. Participation in the CoC's Annual Performance Report (APR) process ensures that the City's efforts meet federal reporting requirements and contribute to broader regional performance goals.

To ensure compliance with CoC policies, the City prioritizes data quality in its use of the Homeless Management Information System (HMIS). The City collaborates with RTFH as the HMIS Lead Agency to ensure strict adherence to privacy, security, and data-sharing protocols.

Additionally, the City aligns its outreach and encampment response efforts with the San Diego CoC Street Outreach Standards and the Regional Unsheltered Policy Guidelines. This alignment emphasizes non-law enforcement-led outreach, trauma-informed care, and collaboration among multiple agencies to address public health and safety concerns while prioritizing housing placements.

Identify any Agency Types not consulted and provide rationale for not consulting

The City maintains a list of agencies, organizations and other stakeholders that have expressed an interest in City's CDBG and HOME program and invited representatives from each entity to participate at multiple points in the planning process. All agencies were strongly encouraged to attend meetings and participate in surveys.

All relevant agencies and groups were invited to participate in the development of the Consolidated Plan; none were intentionally excluded or not invited to participate. Any agency or organization that was not consulted and would like to be included in the City's list of stakeholders, the agency or organization may contact the City at the contact information provided for this Consolidated Plan.

Other local/regional/state/federal planning efforts considered when preparing the Plan

Name of Plan	Lead Organization	How do the goals of your Strategic Plan overlap with the goals of each plan?
Continuum of Care	San Diego CoC	The CoC has established a strategic and coordinated approach to address homelessness throughout the County.
Housing Element	City of Oceanside	The Housing Element and Consolidated Plan both identify the importance of maintaining and expanding the affordable housing stock within the City.
5-year Strategic Plan	Oceanside Housing Authority	In line with the Consolidated Plan, the Housing Authority has established goals to expand the supply of affordable housing and to expand efforts to affirmatively further access to fair housing.

Table 2 – Other local / regional / federal planning efforts

Describe cooperation and coordination with other public entities, including the State and any adjacent units of general local government, in the implementation of the Consolidated Plan (91.215(l))

Narrative (optional):

City of Oceanside departments were consulted with and invited to participate in the community needs and needs assessment process. Adjacent units of government participated in the stakeholder round table and a one-on-one meeting was held. Efforts include, but are not limited to: Regional Task Force on Homelessness/Regional Continuum of Care, Regional Alliance for Fair Housing, adjacent municipal governments, the California Department of Housing and Community Development, and other City of Oceanside Departments, specific to capital improvement and housing element planning,

PR-15 Citizen Participation – 91.105, 91.115, 91.200(c) and 91.300(c)

1. Summary of citizen participation process/Efforts made to broaden citizen participation Summarize citizen participation process and how it impacted goal-setting

In preparation for the Consolidated Plan, the City followed the established processes of the Citizen Participation Plan to ensure broad community engagement. These activities were coordinated and implemented by the Housing Division. The City sought input from its residents by circulating a survey to residents and organizations inquiring about community needs. The survey was available online and in hardcopy format in English and Spanish.

In accordance with the City's Citizen Participation Plan, residents and stakeholders were able to participate in the development of the 2025-2029 Consolidated Plan through various community meetings and five public meetings and the 30-day comment period. Additionally, the City engaged the residents and organizations through a survey and a stakeholder round table. The final noticed public meeting to obtain the views of the community on the City's housing and community development needs were held on March 26, 2025. In accordance with the City's Citizen Participation Plan, all public notices for community meetings and public hearings and the 30-day comment period were published in a medium of general circulation in the City. Additionally, the City used social media platforms such as Facebook and Instagram to advertise the opportunities to participate. At each step in the process, the City was careful to ensure that low- and moderate-income residents, members of minority groups, agencies involved in the provision of services to these populations, and others who are directly impacted by the programs and activities supported by the Consolidated Plan programs had the opportunity to be actively involved.

In accordance with the City's Citizen Participation Plan, all public notices for community meetings and public hearings and the 30-day comment period were published in a medium of general circulation in the City. Additionally, the City used social media platforms such as Facebook and Instagram to advertise the opportunities to participate. At each step in the process, the City was careful to ensure that low- and moderate-income residents, members of minority groups, agencies involved in the provision of services to these populations, and others who are directly impacted by the programs and activities supported by the Consolidated Plan programs had the opportunity to be actively involved.

Needs Assessment

NA-05 Overview

Needs Assessment Overview

The Consolidated Plan Needs Assessment examines housing, homelessness, non-homeless special needs, and non-housing community development needs. The housing needs assessment section evaluates household income, tenure (renter or owner), housing cost as a function of household income, disproportionate need amongst racial and ethnic groups, and public housing needs. The homeless needs assessment examines the sheltered and unsheltered homeless population in San Diego County to inform the City's strategy to address homelessness during the next five years. The non-homeless special needs assessment section evaluates the needs of people who are not homeless, but due to various reasons need services. This population includes elderly, frail elderly, severely mentally ill, developmentally disabled, physically disabled, persons with alcohol or other drug addictions, persons with HIV/AIDS, victims of human trafficking, veterans with Post Traumatic Stress Disorder (PTSD), and victims of domestic violence. The non-housing community development needs assessment section discusses the need for public facilities, public infrastructure improvements and public services to benefit low- and moderate- income residents.

Methodology

To assess community needs, the City examined data, held community meetings, conducted a survey of residents and local stakeholders, and consulted with experts and local stakeholders. The Needs Assessment primarily relies on the sources of data which follow:

- American Community Survey (ACS) 2020 5-year estimates
- Comprehensive Housing Affordability Strategy (CHAS) 2016-2020, and 2024 Point-In-Time Homeless Counts
- The 2020 ACS and CHAS 5-year estimates were the most recent available complete datasets from these sources

The 2020 ACS and CHAS 5-year estimates were the most recent available complete datasets from these sources. Oceanside residents and stakeholders had the opportunity to respond to the Community Needs survey to rate the level of need for public facilities, infrastructure, public and neighborhood services, and housing facilities and services. The survey also provided insight into internet access and disaster preparedness. Additionally, organizations that work with Oceanside residents with low- and moderate incomes, special needs, and those experiencing or at risk or experiencing homelessness were given the opportunity to share their thoughts on the most effective community development projects from the last Consolidated Planning cycle and high priorities in housing, community, or economic development over the next five years.

NA-10 Housing Needs Assessment - 24 CFR 91.205

Summary of Housing Needs

According to the Demographics table, the City of Oceanside's population rose by two percent from 173,050 to 175,695 over the last eleven years from 2009 to 2020. During this time, the number of households rose by one percent from 60,495 to 61,110 and the median household income increased by thirty one percent from \$57,703.00 to \$75,411.00.

[Table 6 - Number of Households](#) presents different household types in the City by levels of income. Small family households consist of two-to-four family members, while large family households have five or more members. The income levels correspond with HUD area median income (AMI) definitions. The Households of El Cajon graph shows how many households are in each income category.

Figure 1 – Households of Oceanside

The most common household type in Oceanside are small family households, representing 44 percent of all households in the City. Large family households represent 12 percent of households. Over 51 percent of all households in Oceanside earn less than 80 percent of AMI.

In this section there are six tables of data which reference housing problems. Housing problems are defined by HUD as follows:

- 1) Lacks complete kitchen facilities: Household lacks a sink with piped water, a range or stove, or a refrigerator.
- 2) Lacks complete plumbing facilities: Household lacks hot and cold piped water, a flush toilet and a bathtub or shower.

3) Overcrowding / severe overcrowding: A household is overcrowded if there are more than 1.01 people per room, excluding bathrooms, porches, foyers, halls, or half-rooms. A household is considered severely overcrowded if there are more than 1.5 people per room.

4) Cost burden / severe cost burden: A household is considered cost burdened if the household pays more than 30 percent of its total gross income for housing costs. A household is considered severely cost burdened if the household pays more than 50 percent of its total income for housing costs. For renters, housing costs include rent paid by the tenant plus utilities. For owners, housing costs include mortgage, taxes, insurance, and utilities.

CHAS data makes clear that housing cost burden greater than 30 percent is the greatest problem across renter and owner households; and renter households are most impacted by severe housing problems. 72 percent of the 29,910 households earning 0-80 percent AMI experience a housing cost burden over 30 percent of income. The majority, 67 percent, of the 13,820 households earning less than 80% AMI with one or more severe housing problems are renter households. (see [Table 7](#))

HOUSEHOLDS WITH MOST SEVERE HOUSING PROBLEMS

Data Source: 2016-2020 CHAS

Describe the number and type of single person households in need of housing assistance.

Elderly or low-income single person households can be presumed to need some type of housing assistance. According to the 2018-2023 five-year ACS estimates approximately thirty-two percent of the 61,656 householders in Oceanside are households with individuals 65 years and over. Twenty-five percent of all the households in the City are occupied by a person living alone. According to Census data, 74% of all lower income renter-households and 55% of all lower income owner-household in Oceanside experienced housing cost burden.

Cost burden is the most prominent housing problem in Oceanside and renters experience it at a higher rate than owners. Over 50% of renter households experience cost burdens, and these households are concentrated in the central census tracts of the city, along State Route 76/Mission Avenue. Elderly and Hispanic renter households also experience cost burdens at higher rates than other household types and

racess. Sensitive communities, those at displacement risk, are also located along State Route 76/Mission Avenue.

	Overcrowded (>1.0 persons per room)	% of All Overcrowded Households
Owner-Occupied	3%	26%
Renter-Occupied	10%	74%
All Households	6%	3,612
Source: ACS Survey 2015-2019		

Contributing Factors:

- Median rent increase
- Displacement of residents due to economic pressures
- The availability of affordable units

Estimate the number and type of families in need of housing assistance who are disabled or victims of domestic violence, dating violence, sexual assault and stalking.

Domestic and dating violence, assault, and stalking are not always reported. According to the 2022 National Crime Victimization Survey, only 53 percent of all domestic violence events and 21 percent of rapes/ sexual assaults were reported to the police. The State of California Department of Justice maintains statistics on domestic violence calls to local law enforcement statewide by jurisdiction (openjustice.doj.ca.gov). In 2022, 807 calls were reported in 2023, 834 calls, and for the first six months of 2024, 399 calls were received related to domestic violence were made by Oceanside residents. Of these incidents:

	2022 (12-months)	2023 (12-months)	2024 (6-months – June 2024)
<i>Total Domestic Violence Calls Received</i>	807	834	399
<i>Total Cases No Weapons Involved</i>	172	237	109

<i>Total Cases in which Weapons Were Involved</i>	635	597	290
<i>Firearm</i>	7	2	0
<i>Knife or Cutting Instrument</i>	13	5	3
<i>Other Dangerous Weapon</i>	29	29	6
<i>Personal Weapon (hands, fists, feet, etc.)</i>	586	561	281

There were at least 800 times during 2022 when a household needed some type of domestic violence services. In households where physical violence occurred, it is possible that at least one member of the household needed to relocate to escape recurring violence. These households may include children.

What are the most common housing problems?

As shown in the Most Prevalent Housing Problems graph [below](#), the most common housing problem in the City is housing cost burden with households paying more than 30 percent of their income and crowding is the next most common problem. This graph consolidates data from [Table 7 – Housing Problem 1 \(Households with one of the listed needs\)](#) by combining households burdened at a rate of 30 to 50 percent and over 50 percent under housing cost burden greater than 30 percent and combining both overcrowded and severely overcrowded households under crowding. The most prevalent housing problems graph shows the four housing problems are experienced in similar proportions by owner and renter households and significantly larger numbers of renter households experience all housing problems.

The data in [Table 7](#) shows 84 percent of households earning less than 80 percent of AMI have a housing cost burden greater than 30 percent. This includes 11,985 renter households and 7,690 owner households. Within this group of cost burdened households, 10,810 are severely cost burdened paying more than 50 percent of their gross income for housing costs, including 6,745 renter households and 4,065 owner households. Overcrowding and severe overcrowding affects 2,670 households or 12 percent of low- and moderate-income households. Renter households account for 83 percent of households impacted by this housing problem.

Renter households bear the brunt of housing problems.

Data Source: 2016-2020 CHAS

Figure 3 – Most prevalent housing problems

Are any populations/household types more affected than others by these problems?

Small related and multiple unrelated family renter households with low- and moderate incomes are most impacted by housing cost burden and overcrowding. [Table 9](#) shows 21,545 households earning less than 80 percent of AMI are 30 to 50 percent cost burdened representing 69 percent of households at this income level. [Table 10](#) shows 8,365 households earning less than 80 percent of AMI are over 50 percent cost burdened representing 27 percent of households at this income level. Single family renter households are most impacted by overcrowding representing 1,915 households earning less than 80 percent AMI.

Describe the characteristics and needs of Low-income individuals and families with children (especially extremely low-income) who are currently housed but are at imminent risk of either residing in shelters or becoming unsheltered 91.205(c)/91.305(c)). Also discuss the needs of formerly homeless families and individuals who are receiving rapid re-housing assistance and are nearing the termination of that assistance

Extremely low (0-30 percent AMI) and low-income (30-50% AMI) households are presumed to be unstably housed, these households are considered at high risk of falling into homelessness or may currently be experiencing homelessness. Those with one or more housing problems at this income level are highly sensitive to adverse events. The greatest concentrations of unstably housed households are among small family households, households with at least one-member aged 62 or above, and renters with at least

one housing problem, small related renter households with a housing cost burden greater than 30 percent of their income.

There are 17,800 households in Oceanside earning less than 50 percent of AMI, representing 29 percent of all households. Small related renter households in this income range are most impacted by housing cost burden as seen in graphs below. Renter households in this income range are almost three times more likely than owner households to experience a housing cost burden of 30 to 50 percent of their income. However elderly owners are more likely than elderly renters to experience a housing cost burden on both 30 to 50, and greater than 50 percent of their income. Furthermore, at this income level approximately 1,340 households live in overcrowded conditions

Data Source: 2016-2020 CHAS

Figure 4 – Households With >30% Cost Burden

Data Source: 2016-2020 CHAS

Figure 5 – Households With >50% Cost Burden

As described in the Housing Market Analysis section of this report, rental housing costs have risen steadily over the past five years creating more pressure on extremely low-income households. According to Zumper, a rental listing aggregator, the monthly market rate rent for a two-bedroom apartment in Oceanside went from \$2,400 in December 2022 to \$2,800 in January 2025, a change of 16 percent. One-bedroom units increased at a rate of 16 percent. As rental prices continue to rise throughout San Diego County, the pressure on extremely low-income households will continue to increase.

Individuals and families whose rental assistance has or will be terminating soon are at risk of not being able to find affordable, size-appropriate housing units. As noted in the market analysis, the cost of housing has increased significantly over the past 5 years and the supply of units affordable to families at or below 50% AMI does not match the demand.

Rapid rehousing programs help homeless individuals and families but, unless a housing unit they can reasonably afford is available, formerly homeless families and individuals receiving rapid rehousing assistance may face uncertainty with respect to their monthly housing costs and ability to remain stably housed at the end of the assistance contract. Near the termination of assistance, finding replacement housing is difficult for the same reasons it was difficult before becoming homeless: high housing cost and the possibility of an eviction record.

If a jurisdiction provides estimates of the at-risk population(s), it should also include a description of the operational definition of the at-risk group and the methodology used to generate the estimates:

The assessment of at-risk populations described in the foregoing paragraphs in this Consolidated Plan is based on ACS and CHAS data using HUD definitions for household types and housing problems, supplemented by available local data for certain groups specified by HUD, such as households with children and victims of domestic violence, dating violence, sexual assault, and stalking.

Specify particular housing characteristics that have been linked with instability and an increased risk of homelessness

According to Housing Problem table ten, there are 2,775 renter households who earn less than 50 percent of AMI and are cost burdened at a rate greater than 50 percent of income. Of these households:

- 1640 are elderly households with one or more members over the age of 62, and
- 1,135 are other households.

These extremely low- and low-income households are considered the most at risk of becoming homeless.

Discussion

According to the housing problems tables above, of households with incomes at or below 50 percent of AMI 42 percent are cost burdened renters, and 7 percent are crowded renters. Of households with incomes at or below 30 percent of AMI 23 percent are severely cost burdened renters and 4 percent are crowded renters. These households are presumed to be most at risk of becoming homeless.

To the greatest extent feasible, options for assistance could make affordable housing accessible to severely cost burdened and crowded renter households who earn less than 50 percent of AMI. This is one of many ways to prevent homelessness.

NA-15 Disproportionately Greater Need: Housing Problems – 91.205 (b)(2)

Introduction

Sections NA-15, NA-20, and NA-25 of the Needs Assessment examine housing problems experienced by racial or ethnic groups and identifies when that occurs at a disproportionately greater frequency. This is indicated when members of a racial or ethnic group in a certain income range experience housing problems at a greater rate (10 percentage points or more) than the rate of housing problems experienced by all households within that income level. For example, when evaluating 0-30 percent of AMI households, if 50 percent of the households experience a housing problem, but 60 percent or more of a particular racial or ethnic group of households' experience housing problems, that group has a disproportionately greater need. Please note, as part of the CHAS data set, HUD did not calculate households with no/ negative income, but one or more of the other housing problems by race or ethnicity for the 2016-2020 period.

Housing problems and severe housing problems analyzed in sections NA-15 and NA-20 are based on the definitions that follow.

- 1) Lacks complete kitchen facilities: Household lacks a sink with piped water, a range or stove, or a refrigerator.
- 2) Lacks complete plumbing facilities: Household lacks hot and cold piped water, a flush toilet and a bathtub or shower.
- 3) Overcrowded Household with more than 1.01 people per room.
- 4) Cost burden: A household is considered cost burdened if the household pays more than 30 percent of its total gross income for housing costs.

The graphs below represent the racial and ethnic breakdown of the residents of Oceanside.

Community Development and Planning Maps

Maps will be inserted which illustrate the racial or ethnic composition of the City by Census Tract as reported in the 2016-2020 American Community Survey Estimates, for races which represent at least two percent of the population.

Discussion

The method of calculating disproportionate need sets different groups of different sizes on equal footing, making it possible for any outsized impact on groups to be identified. However, throughout the city and across different races and ethnicities, 87 percent of residents with one or more of four housing problems earn 0-30 percent of AMI and 76 percent of residents earn 30-50 percent of AMI. These are very high rates of need which require almost an entire sub-population to be in need for disproportional impact to register.

The analysis shows the following:

Data Source: 2016-2020 CHAS

Figure 8 – Disproportionate Need Across Households Earning <30% AMI

Across households with incomes below 30 percent of AMI there is a disproportionate concentration of those with one or more housing problem among households which identify racially or ethnically as follows: Black / African American, American Indian, Alaska Native, Pacific Islander, and Hispanic.

NA-20 Disproportionately Greater Need: Severe Housing Problems – 91.205

(b)(2)

Introduction

Similar to the previous section, the Severe Housing Problems tables provide data to determine if disproportionate housing needs exist for any racial or ethnic group that experiences severe housing problems, which are defined as:

- 1) Lacks complete kitchen facilities: Household does not have a stove/oven and refrigerator.
- 2) Lacks complete plumbing facilities: Household does not have running water or modern toilets.
- 3) Severe overcrowding: A household is considered severely overcrowded if there are more than 1.5 people per room.
- 4) Severe cost burden: A household is considered severely cost burdened if the household pays more than 50 percent of its total income for housing costs. For renters, housing costs include rent paid by the tenant plus utilities. For owners, housing costs include mortgage payment, taxes, insurance, and utilities.

Please note as part of the CHAS data set HUD did not calculate households with no/ negative income, but one or more of the other housing problems by race or ethnicity for the 2016-2020 period.

Discussion

This discussion highlights the disproportionately severe housing needs of racial and ethnic groups by income category. The narrative draws heavily on the NA-15 Severe Housing Problems table. The analysis shows the following:

Across Households with incomes below 30 percent of AMI there is a disproportionate concentration of those with one or more housing problem among households which identify racially or ethnically as follows: Black / African American, American Indian, Alaska Native, Pacific Islander, and Hispanic

Figure 13 – Disproportionate Need Across Households Earning 30-50% AMI

Across Households with incomes in the 30-50 percent of AMI there is a disproportionate concentration of those with one or more housing problem among households which identify racially or ethnically as follows: Black / African American, American Indian, Alaska Native, Pacific Islander, and Hispanic

Figure 14 – Disproportionate Need Across Households Earning 50-80% AMI

Across Households with incomes in the 50-80 percent of AMI there is a disproportionate concentration of those with one or more housing problem among households which identify racially or ethnically as follows: Hispanic

Data Source: 2016-2020 CHAS

Figure 15 – Disproportionate Need Across Households Earning 80-100% AMI

Across Households with incomes in the 80-100 percent of AMI there is a disproportionate concentration of those with one or more housing problem among households which identify racially or ethnically as follows: Black / African American, Asian, American Indian, Alaska Native, and Hispanic

NA-25 Disproportionately Greater Need: Housing Cost Burdens – 91.205 (b)(2)

Introduction:

HUD defines cost burden as the extent to which gross housing costs, including utility cost, exceeds 30 percent of a given household's gross income. A household is considered severely cost burdened if gross housing costs, including utility costs, exceed 50 percent of a household's gross income.

Disproportionate need is revealed when members of a racial or ethnic group experience housing problems at least 10 percent points higher than the category of need as a whole. For example, if 30% of renters in the city experienced cost burdens, but Hispanic households faced the problem at 50%, then this would indicate that Hispanic households have a disproportionately greater need.

As specified in 91.205(b)(2), 91.305(b)(2), and 91.405, this Consolidated Plan must include an assessment for each disproportionately greater need. The tables show need by racial and ethnic group.

Similar to past sections, income is grouped as follows: 0%-30% AMI is extremely low-income, 31%-50% AMI is low-income, 51%-80% AMI is moderate income, and 91%-100% is middle income.

Table 20 – Greater Need: Housing Cost Burdens AMI

Housing Cost Burden	<=30%	30-50%	>50%	No / negative income (not computed)
Jurisdiction as a whole	33,630	14,500	11,650	2,195
White	21,875	7,870	6,025	1,550
Black / African American	1,540	805	645	95
Asian	2,385	935	480	65
American Indian, Alaska Native	160	40	125	10
Pacific Islander	175	145	50	0
Hispanic	6,635	4,280	3,825	415

Data Source: 2016-2020 CHAS

Discussion:

The analysis shows the following:

Figure 16 – Disproportionate Need Across Households Cost Burden 30-50% AMI

Across Households with housing cost burdens equivalent to 30-50 percent of their income there is a disproportionate concentration of those with one or more housing problem among households which identify racially or ethnically as follows: Pacific Islander, and Hispanic

Figure 17 – Disproportionate Need Across Households Cost Burdened >50% AMI

Across Households with incomes in the 30-50 percent of AMI there is a disproportionate concentration of those with one or more housing problem among households which identify racially or ethnically as follows: Black / African American, American Indian, Alaska Native, and Hispanic

NA-30 Disproportionately Greater Need: Discussion – 91.205(b)(2)

Are there any income categories in which a racial or ethnic group has disproportionately greater need than the needs of that income category as a whole?

The following racial or ethnic groups were found to have a disproportionately greater level of housing problems relative to the percentage of all households in the given income category experiencing housing problems:

- 0 - 30 percent AMI:
 - Black / African American
 - American Indian, Alaska Native
 - Pacific Islander
 - Hispanic
- 30 - 50 percent AMI:
 - Black / African American
 - Hispanic
- 50 - 80 percent AMI:
 - Black / African American
 - American Indian, Alaska Native
 - Pacific Islander
 - Hispanic
- 80 - 100 percent AMI:
 - Black / African American
 - Asian
 - American Indian, Alaska Native.

The following racial or ethnic groups were found to have a disproportionately greater level of severe housing problems relative to the percentage of all households in the given income category experiencing severe housing problems:

- 0 - 30 percent AMI:
 - Black / African American
 - American Indian, Alaska Native
 - Pacific Islander
 - Hispanic.
- 30 - 50 percent AMI:
 - Black / African American
 - American Indian, Alaska Native
 - Pacific Islander
 - Hispanic.

- 50 - 80 percent AMI:
 - Hispanic.
- 80 - 100 percent AMI:
 - Black / African American
 - Asian
 - American Indian, Alaska Native
 - Hispanic.

The following racial or ethnic groups had a disproportionately greater level of housing cost burden:

- 30 – 50 percent of income:
 - Black / African American
 - Asian
 - Pacific Islander
 - Hispanic.
- Greater than 50 percent of income:
 - Black / African American
 - American Indian, Alaska Native
 - Hispanic.

If they have needs not identified above, what are those needs?

No other housing needs for these specific racial or ethnic groups were identified through consultation or citizen participation.

Are any of those racial or ethnic groups located in specific areas or neighborhoods in your community?

As part of the 2021-2029 Housing Element the City prepared the state mandated Assessment of Fair Housing. This Assessment includes Dissimilarity Indexing, which shows how segregated or integrated two various racial/ethnic groups are. Values between 0 and 39 generally indicate high integration (low segregation), values between 40 and 54 generally indicate moderate segregation, and values between 55 and 100 generally indicate a high level of segregation. Oceanside has low levels of segregation, across all racial and ethnically Hispanic groups; it is below 40. Oceanside is significantly more integrated than San Diego County as a whole. Despite the city's relatively low levels of segregation, it should be noted that since 1990 the levels of segregation have slowly increased.

Table 21 – Dissimilarity Trends

	1990 Trend	2000 Trend	2010 Trend	Current
Oceanside, CA				
Non-White/ White	29.3	31.3	26.7	32.1
Black/ White	27.2	27.3	22.8	29.6
Hispanic/ White	34.8	38.0	31.9	37.5
Asian or Pacific Islander/ White	20.8	21.9	21.4	26.7
San Diego County				
Non-White/ White	43.4	45.2	42.9	46.4
Black/ White	58.0	53.8	48.4	54.1
Hispanic/ White	45.2	50.6	49.6	51.7
Asian or Pacific Islander/ White	48.1	46.8	44.4	49.8

NA-35 Public Housing – 91.205(b)

Introduction

The City of Oceanside is predominately served by the Oceanside Housing Authority. The OHA does not own or operate public housing, providing only Housing Choice Vouchers, i.e., Section 8 rental assistance.

DRAFT

Section 504 Needs Assessment: Describe the needs of public housing tenants and applicants on the waiting list for accessible units:

The Oceanside Housing Authority fully complies with HUD Notice PIH 2002-01 (Accessibility Notice: Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990; the Architectural Barriers Act of 1968 and the Fair Housing Act of 1988) when requests are made for a reasonable accommodation due to a disability. An applicant or participant must qualify under the following American with Disabilities Act (ADA) definition of disability:

- A physical or mental impairment that limits an individual's ability to participate in major life activities;
- A record of such impairment; or
- Being regarded as having such impairment.

The Fair Housing acts prohibits discrimination on the basis of disability in any program or activity that is conducted by federal agencies or that receives financial assistance from a federal agency. A housing provider may not deny or refuse to sell or rent to a person with a disability and may not impose application or qualification criteria, rental fees or sales prices and rental or sales terms or conditions that are different than those required of or provided to persons who are not disabled. Further, housing providers may not require persons with disabilities to live only on certain floors, or to all live in one section of the housing. Housing providers may not refuse to make repairs and may not limit or deny someone with a disability access to recreational and other public and common use facilities, parking privileges, cleaning or janitorial services or any services which are made available to other residents.

Most immediate needs of residents of Public Housing and Housing Choice voucher holders

According to the HACSD, the most pressing need is the high demand for affordable housing throughout San Diego County. This is documented by the long wait time for Public Housing and for a Housing Choice Voucher (HCV). The long wait time for HCV from the Oceanside's Housing Authority displays this need. As of February 27, 2025, there are currently 5,059 households on the HCV waiting list, equating to approximately a 10-year wait time.

Beyond the need for affordable housing, residents also need additional access to service programs such as:

- Job training and placement;
- Youth employment and educational programs;
- Childcare services; and
- Transportation.

How do these needs compare to the housing needs of the population at large?

Voucher households need affordable housing. A shortage of affordable housing and a current vacancy rate of 3% in Oceanside makes it more difficult to find suitable rental housing. Additionally, increasing inflation is impacting low-income household's ability to afford basic needs. These challenges are similar to the population at large.

The needs experienced by HACSD residents are similar to the needs of very low-income and low-income households throughout the City of Oceanside based on the housing problem tables listed above.

Limited voucher funding, which is set by Congress, has not kept up with demand. Additionally, rental assistance is in short supply. According to "Worst Case Housing Needs 2023 Report to Congress" from HUD's Office of Policy Development and Research, only about one in four eligible households nationwide received rental assistance.

Discussion

The HACSD implements a variety of strategies to address the need for affordable housing. The core strategies include maximizing affordable housing opportunities through continuous program and management improvement and leveraging additional resources by working with the County's Affordable Housing and CDBG units.

NA-40 Homeless Needs Assessment – 91.205(c)

Introduction:

Throughout the San Diego region, homelessness has become an increasing problem as shown on the most recent Point in Time (PIT) Count conducted by the Regional Task Force on Homelessness (RTFH). Using the HUD CoC definition (§578.3), there are four federally defined categories under which individuals and families are considered homeless:

- 1) **Literally Homeless** – Individuals or families experiencing literal homelessness are those without a fixed, regular, and adequate nighttime residence. This population encompasses:
 - a. Unsheltered individuals living on the street, in encampments, parks, or other places not meant for human habitation;
 - b. Individuals residing in vehicles, abandoned buildings, or makeshift shelters;
 - c. Persons staying in emergency shelters or transitional housing including individuals temporarily residing in motels or hotels paid by government or charitable organizations; and
 - d. Individuals exiting institutions (such as hospitals, jails, or treatment centers) after residing there for 90 days or less, provided they were homeless immediately before their institutional stay.
- 2) **Imminent Risk of Homelessness** – An individual or family imminently losing their housing:
 - a. Housing will be lost within 14 days; and
 - b. Has no alternate housing options, support networks, or financial resources to secure new accommodations

Situations leading to imminent risk include eviction, foreclosure, and sudden loss of living arrangements (such as doubling up with friends or family).
- 3) **Homeless Under other Federal Statutes** – This category pertains to unaccompanied youth under the age of 25 or families with children and youth, who do not meet the primary HUD definition of homelessness but qualify under other federal statutes, including the McKinney-Vento Homeless Assistance Act. Criteria for this category include:
 - a. Experiencing significant housing instability, as demonstrated by two or more moves within a 60-day period prior to applying for assistance;
 - b. Lacking a lease or permanent housing arraignment within the past 60 days; and
 - c. Facing barriers that impede long-term stability, such as chronic health conditions, history of domestic violence, disabilities, or employment barriers (e.g., limited education, language barriers, criminal history).

- 4) Fleeing or attempting to flee Domestic Violence – An individual or family fleeing domestic violence, sexual assault, stalking, or other life-threatening conditions are considered homeless under this category when they:
 - a. Have no safe alternative living arrangements; and
 - b. Lacks the resources and support systems to secure safe housing independently.

Local Trends and Observations

The most recent 2024 Point-in-Time (PIT) Count conducted by the Regional Task Force on Homelessness (RTFH) recorded 522 individuals experiencing homelessness in the City of Oceanside. This represents an 11% decrease from the previous year's count, highlighting some progress in addressing homelessness. However, the data also shows a 24.5% increase in the unsheltered population, with 361 individuals living in places not meant for habitation and 161 individuals residing in emergency shelters or transitional housing, reflecting a 46% decrease in the sheltered population. Despite the overall decline since 2016, the increase in unsheltered homelessness underscores ongoing challenges related to housing affordability and service accessibility. Several key factors contribute to homelessness trends in Oceanside. High housing costs are a significant barrier, with the average monthly rent for a one-bedroom apartment reaching \$2,615. A household would need to earn around \$8,717 per month to avoid being cost-burdened, a figure far exceeding the incomes of minimum wage workers and seniors relying on Social Security benefits. For instance, a full-time minimum wage earning \$2,860 per month would need to allocate 91% of their income towards rent, while seniors earning \$2,617 per month would spend almost all their income on housing.

In 2024, city-funded homeless programs served 1,071 individuals. The largest age group among those served was seniors aged 55 and older. About 47% of the homeless population identifies as female, with 7% being mothers with children. Additionally, 20% of this group experienced homelessness for more than a year, indicating that a significant portion struggle with chronic homelessness. Self-reported health conditions at program intake highlight the need for comprehensive supportive services, with 33% reporting mental health disorders, 28% physical disabilities, 27% chronic health conditions, and 12% substance use disorders.

Chronic homelessness remains a pressing concern in Oceanside, with individuals often experiencing co-occurring mental health and substance use disorders. In response, the City collaborates closely with San Diego County Behavioral Health Services and local healthcare providers to deliver integrated services addressing these complex needs. Programs like the Oceanside Navigation Center, operated by the San Diego Rescue Mission (SDRM), play a pivotal role in this effort, serving 496 individuals in 2024, including 186 chronically homeless persons, 43 veterans, and 26 youth under 25. Of those served, 50.2% exited with positive housing outcomes, highlighting the Center's effectiveness in facilitating transitions to stable housing.

If data is not available for the categories "number of persons becoming and exiting homelessness each year," and "number of days that persons experience homelessness," describe these categories for each homeless population type (including chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth):

Local Trends and Observations

DRAFT

Nature and Extent of Homelessness: (Optional)

Race: White	Sheltered: Predominantly represented, comprising approximately 45% of the homeless population across both sheltered and unsheltered settings.	Unsheltered (optional)
Ethnicity: Hispanic/Latino	Sheltered: Represents approximately 15%, with slight variations between sheltered and unsheltered groups.	Unsheltered (optional)
Black or African American	Constitutes approximately 20% of the population, reflecting a disproportionate representation compared to the city's overall demographics.	
Native American/Alaska Native	Accounts for roughly 3% of the population, with equal distribution across sheltered and unsheltered settings.	
Asian and Pacific Islander	These groups comprise approximately 4% of the homeless population.	
Other or Multiracial	Comprise around 13%, reflecting individuals identifying with two or more racial or ethnic categories.	

In terms of ethnicity, approximately 20% of individuals identified as Hispanic/Latino, with a higher proportion in the sheltered population compared to the unsheltered population.

Estimate the number and type of families in need of housing assistance for families with children and the families of veterans.

Local Trends and Observations

The most recent 2024 Point-in-Time (PIT) Count conducted by the Regional Task Force on Homelessness (RTFH) recorded 522 individuals experiencing homelessness in the City of Oceanside. This represents an 11% decrease from the previous year's count, highlighting some progress in addressing homelessness. However, the data also shows a 24.5% increase in the unsheltered population, with 361 individuals living in places not meant for habitation and 161 individuals residing in emergency shelters or transitional housing, reflecting a 46% decrease in

the sheltered population. Despite the overall decline since 2016, the increase in unsheltered homelessness underscores ongoing challenges related to housing affordability and service accessibility.

Several key factors contribute to homelessness trends in Oceanside. High housing costs are a significant barrier, with the average monthly rent for a one-bedroom apartment reaching \$2,615. A household would need to earn around \$8,717 per month to avoid being cost-burdened, a figure far exceeding the incomes of minimum wage workers and seniors relying on Social Security benefits. For instance, a full-time minimum wage earning \$2,860 per month would need to allocate 91% of their income towards rent, while seniors earning \$2,617 per month would spend almost all their income on housing.

Describe the Nature and Extent of Homelessness by Racial and Ethnic Group.

The 2024 Annual Performance Reports (APRs) indicate a diverse racial and ethnic composition among individuals experiencing homelessness in Oceanside. The racial breakdown for both sheltered and unsheltered populations is as follows:

- White: Predominantly represented, comprising approximately 45% of the homeless population across both sheltered and unsheltered settings.
- Black or African American: Constitutes approximately 20% of the population, reflecting a disproportionate representation compared to the city's overall demographics.
- Hispanic/Latino: Represents approximately 15%, with slight variations between sheltered and unsheltered groups.
- Native American/Alaska Native: Accounts for roughly 3% of the population, with equal distribution across sheltered and unsheltered settings.
- Asian and Pacific Islander: These groups comprise approximately 4% of the homeless population.
- Other or Multiracial: Comprise around 13%, reflecting individuals identifying with two or more racial or ethnic categories.

In terms of ethnicity, approximately 20% of individuals identified as Hispanic/Latino, with a higher proportion in the sheltered population compared to the unsheltered population.

Describe the Nature and Extent of Unsheltered and Sheltered Homelessness.

NA-45 Non-Homeless Special Needs Assessment - 91.205 (b,d)

Introduction:

This section evaluates persons who are not homeless but due to various reasons are in need of services and supportive housing. Persons with special needs include the elderly, frail elderly, severely mentally ill, developmentally disabled, physically disabled, persons with alcohol or other drug addictions, persons with HIV/AIDS and victims of domestic violence. The City of Oceanside will consider allocating CDBG public service funding to programs that provide services to special needs populations, including but not limited to those serving the elderly, frail elderly, developmentally disabled, physically disabled, mentally disabled, persons with alcohol or other drug addictions, persons with HIV/AIDS, victims of domestic violence or other needs.

Describe the characteristics of special needs populations in your community:

Elderly and frail elderly: The U.S. Department of Housing and Urban Development (HUD) defines elderly as a person who is 62 years of age or older. A frail elderly person is an elderly person who is unable to perform at least three “activities of daily living” including eating, bathing or home management activities. Generally, elderly persons have lower incomes than the population at large. Based on 2016-2020 CHAS data, of the 20,200 total households containing at least one elderly person, 54% (10,910) of households earn less than 80 percent of the AMI in Oceanside.

Persons with Disabilities: HUD defines a disabled person as having a physical or mental impairment that substantially limits one or more major life activities. The obstacle to independent living for these adults is not only their disability, but also the lack of financial resources, often related to limited employment. Additionally, persons with disabilities have high health care costs, are dependent on supportive services, and may require accessibility modifications to accommodate their disability. Based on ACS data, of the total Civilian Noninstitutionalized Population in Oceanside, the percent with a disability is 10.8% (18,215). Of those with a disability between the ages of 18-64, 47% are in the labor force and the remaining 53% are not actively holding or seeking a job. For those with a disability not participating in the labor force, they may have a higher demand for services and assistance to address their needs.

Alcohol and Other Drug Addictions: Drug abuse or substance abuse is defined as the use of chemical substances that lead to an increased risk of problems and an inability to control the use of the substance. According to the Centers for Disease Control and Prevention, there were 70,237 drug overdose deaths in the United States in 2017 and that of those deaths, 47,600 involved opioids. According to the CDC, the national ‘opioid epidemic’ began in the 1990s with increased prescribing of opioids such as Methadone, Oxycodone, and Hydrocodone. Beginning in 2010, CDC reported rapid increases in overdose deaths involving heroin. The third wave began in 2013 with increases in overdose deaths involving synthetic opioids such as the illicitly manufactured fentanyl, often found in combination with heroin, counterfeit pills, and cocaine.

Although California was among 10 states with the lowest drug overdose mortality in each year from 2017-2020, the proliferation of fentanyl is a significant and relatively new issue requiring increased public awareness and services.

HIV/AIDS: Human Immunodeficiency Virus (HIV) is a virus that weakens one's immune system by destroying important cells that fight diseases and infection. Acquired Immune Deficiency Syndrome (AIDS) is the final stage of HIV. According to the 2022 Annual HIV Surveillance Report for San Diego County, there were 13,66 persons living with HIV/AIDS countywide. In 2022, there were 14 reported new cases of HIV/AIDS in the County. According to the San Diego County 2022 HIV/AIDS report, of the new diagnoses 61.9% were Hispanic/Latino, 21.9% White, and 10.9% Black.

Victims of Domestic Violence: Domestic Violence includes, but is not limited to, felony or misdemeanor crimes of violence committed by a current or former spouse of the victim or by a person who is cohabitating with or has cohabited with the victim. In 2018, the California Department of Justice Criminal Justice Statistics Center reported 943 domestic violence calls for assistance in Oceanside. 77% (729) of the calls reported that a weapon was involved in the incident.

What are the housing and supportive service needs of these populations and how are these needs determined?

Special needs populations in Oceanside are more likely to be extremely low- or low-income households and thus have a greater need for affordable housing. Further, through input from residents and community stakeholders, special needs populations have a greater need for public services, access to public facilities, affordable housing and access to fair housing. Specific needs include access to housing, transportation, job training programs, childcare, access to basic services, and other needs as identified by community-based service providers.

Discuss the size and characteristics of the population with HIV/AIDS and their families within the Eligible Metropolitan Statistical Area:

Special needs populations in Oceanside are more likely to be extremely low- or low-income households and thus have a greater need for affordable housing. Further, through input from residents and community stakeholders, special needs populations have a greater need for public services, access to public facilities, affordable housing and access to fair housing. Specific needs include access to housing, transportation, job training programs, childcare, access to basic services, and other needs as identified by community-based service providers.

If the PJ will establish a preference for a HOME TBRA activity for persons with a specific category of disabilities (e.g., persons with HIV/AIDS or chronic mental illness), describe their unmet need for housing and services needed to narrow the gap in benefits and services received by such persons. (See 24 CFR 92.209(c)(2) (ii))

While the City of Oceanside contracts out for the provision of HOME TBRA there is no established preference.

Discussion:

Summary of non-homeless special needs included above.

DRAFT

NA-50 Non-Housing Community Development Needs – 91.215 (f)

Describe the jurisdiction's need for Public Facilities:

The City of Oceanside manages and/ or supports a range of public facilities that provide critical services and programs for residents within the City. There is a growing need for new facilities as well as rehabilitation and updates to existing facilities to continue to meet the needs of the community.

As part of the community survey, participants indicated the highest level of need for Youth Centers and Parks & Recreational Facilities.

Additional stakeholder input indicated a need for ADA improvements to existing public facilities as well as a need for additional park, community, mental health, and homeless facilities within the City.

How were these needs determined?

The Public Facility needs were identified through consultation with multiple stakeholder groups based in the City of Oceanside, consultation with different City departments, and input from community members through the Community Survey.

Describe the jurisdiction's need for Public Improvements:

Residents and stakeholders identified a growing need to improve access to and the delivery of transit services and options to better enable residents to travel throughout the City and not be dependent on personal vehicles. Stakeholders also identified a need to increase access to low-cost high-speed broadband services for residents throughout the City.

How were these needs determined?

The Public Improvement needs were identified through consultation with multiple stakeholder groups based in the City of Oceanside, consultation with different City departments, and input from community members through the Community Survey.

Describe the jurisdiction's need for Public Services:

moderate-income and special needs populations throughout the City. Services include those targeted to certain age groups (e.g. senior and youth programming and services) as well as for certain populations (e.g. homeless and substance abuse training) as well as more general service needs such as job training and employment assistance, community programming, transportation, anti-crime and healthcare services. The three highest rated public service needs in the Community Survey are Mental Health Services, Homeless Services, and Crime Prevention Programs.

The need for public services is beyond what the City can target through CDBG funding and the City will continue to identify opportunities for leverage and partnership to address these needs.

How were these needs determined?

The Public Service needs were identified through consultation with multiple stakeholder groups based in the City of Oceanside, consultation with different City departments, and input from community members through the Community Survey.

DRAFT

Housing Market Analysis

MA-05 Overview

Housing Market Analysis Overview:

As part of the Consolidated Plan requirements, Oceanside must complete a market analysis. The market analysis consists of the following sections:

- Cost/Condition/Supply of Housing
- Public Housing Supply
- Homeless and Special Needs Facilities/ Services
- Non-Housing Community Development Conditions (including economic conditions, access to broadband, and hazard mitigation)

Affordable housing is very limited for households earning less than 80% of the AMI, especially those with income lower than 30% of AMI. According to a gap analysis conducted by the City of San Diego, renters making below \$50,000 do not have adequate supply of affordable housing. The gap is largest for renters with very low-income (less than \$10,000), who live on fixed incomes, and renters with incomes between \$25,000 and \$35,000.

Additionally, homeownership is unaffordable to those making less than \$150,000. The Greater San Diego Association of Realtors reported that, as of June 2023, the median sales price of a home in the region was \$805,500. Compared to 2022, the prices for condos and townhomes increased the most (by 3.3%) and as of June 2023, the median sales price was \$620,000. On the positive side, the market does seem to be softening a bit: fewer homes were selling for over the listed price in 2023 compared to 2022 and price increases are slowing. However, very low inventory is likely to keep prices high.

MA-10 Number of Housing Units – 91.210(a)&(b)(2)

Introduction

According to 2016-2020 ACS data, 72% of the City's housing stock is comprised of single-family housing (1-4 units). Multifamily housing (5+ units) accounts for 34% of total housing units in the City reflecting a 10% increase in multifamily housing in the past five years. This trend toward more compact development is consistent with the smart growth principles encouraged by state law and embodied in regional plans and programs. The largest shares of multifamily housing are located in the neighborhoods north of Mission Blvd and west of Ron Ortega Recreation Park.

Most of the City's ownership housing (74%) is comprised of larger units containing three or more bedrooms. In comparison, only 31% of the City's rental housing is comprised of larger units. The tables below indicate the number of residential properties in the City by property type, unit size and tenure.

All residential properties by number of units

Property Type	Number	%
1-unit detached structure	35,216	53%
1-unit, attached structure	7,948	12%
2-4 units	871	7%
5-19 units	9,890	15%
20 or more units	5,675	15%
Mobile Home, boat, RV, van, etc	3,155	4%
Total	66,475	100%

Table 7 – Residential Properties by Unit Number

Data Source: 2016-2020 ACS

Unit Size by Tenure

	Owners		Renters	
	Number	%	Number	%
No bedroom	150	0%	905	3%
1 bedroom	575	2%	5,725	22%
2 bedrooms	7,995	23%	11,455	43%
3 or more bedrooms	25,415	74%	8,265	31%

Table 8 – Unit Size by Tenure

Data Source: 2016-2020 ACS

Describe the number and targeting (income level/type of family served) of units assisted with federal, state, and local programs.

The table attached to the bottom of "Unit Size by Tenure" table summarizes all affordable housing units that are currently subsidized with Federal, state and local funding located in Oceanside. Table was placed here due to IDIS entry limitations.

Project Name	Street Address	Affordable Units	Total Units	Construction Completion

Sources: City of Oceanside; August 2020. Multifamily Assistance & Section 8 Database, HUD, Jan 29, 2021.

Provide an assessment of units expected to be lost from the affordable housing inventory for any reason, such as expiration of Section 8 contracts.

At this time, there are no units that are expected to be lost from the affordable housing inventory during this Consolidated Plan cycle. The City will continue to monitor all developments and work with property owners to identify strategies to extend the affordability terms when appropriate and possible.

Does the availability of housing units meet the needs of the population?

The available housing units within Oceanside do not meet the overall needs of the population. As discussed in the Needs Assessment, 36% of all households earning less than 100% AMI experience at least one housing problem – indicating that the current availability of housing units does not meet the needs of the population. Nearly 2,000 (1,985) renter households below 100% AMI experience overcrowding and are in need of larger, more affordable housing units. Further, according to the ACS,

the rental vacancy rate is 3-4% - indicating a low share of available housing stock, making it more challenging for renters to identify and move to more suitable, affordable housing stock in the City.

Describe the need for specific types of housing:

As indicated above, Oceanside has a need to continue to prioritize maintaining the existing affordable housing stock within the City. Additionally, the City has a need for additional rental housing targeted for low-income households – especially families and senior populations.

Oceanside, CA Rental Market Trends		
Oceanside Apartment Rent Ranges	7% between \$1,501 - \$2,000	93% greater than \$2,000

Discussion

The Regional Housing Needs Allocation (RHNA) developed and adopted by SANDAG covers the growth projection and planning period from June 30, 2020 through April 15, 2029. The RHNA assigns a housing production to each jurisdiction in the region. Oceanside must identify adequate land with appropriate zoning and development standards to accommodate its allocation of the regional housing need.

In accordance with *Government Code* §65584, the RHNA plan distributes total housing need for each jurisdiction among the following four income categories:

- Very low income (50% or less of county median income)
- Low income (51-80% of county median income)
- Moderate income (81-120% of county median income)
- Above moderate income (over 120% of county median income)

2021-2029 Oceanside Growth Needs

The total housing growth need allocated to the City of Oceanside for the 2021-2029 Housing Element 5,443 units. This total is distributed by income category as shown in Table 9241. While not explicitly addressed in the RHNA, state law¹ now requires the Housing Element to also estimate the future needs of extremely-low-income (ELI) households. As provided by state law, the ELI need has been estimated to be 50% of the very-low category, or 634 units during this planning period.

Table 9: Oceanside Housing Growth Needs 2021-2029

Very Low*	Low	Moderate	Above Mod	Total
1,268	718	883	2,574	5,443
23%	13%	16%	47%	100%

DRAFT

MA-15 Housing Market Analysis: Cost of Housing - 91.210(a)

Introduction

One of the most important factors in evaluating a community's housing market is the cost of housing and, even more significant, whether the housing is affordable to households who live there or would like to live there. Housing problems directly relate to the cost of housing in a community. If housing costs are relatively high in comparison to household income, a correspondingly high prevalence of housing cost burden and overcrowding occurs.

Between 2010 and 2022, the median home values in San Diego region, as measured by the American Community Survey (ACS), increased by 80%. Rents have also increased significantly, rising 68% between 2010 and 2022. The annual household income needed to afford the median rent and utilities is \$85,000.

The tables below indicate the median home value and contract rent (not including utility or other associated costs). These values are self-reported by residents through the U.S. Census American Community Survey. However, in looking at more current housing sales and rental market data – the cost of housing has risen tremendously over the past five years.

According to Zumper, a rental listing aggregator, average rents for 1-bedroom, 2-bedroom, and 3-bedroom all rose from December 2022 to January 2025 and significantly exceeded the median contract rent as reported by the ACS 2011-2015 estimates documented in the Cost of Housing table below.

Similarly, owner-occupied housing costs have also increased over the past five years. According to Zillow, from January 2020 to December 2025, the median sales price rose from \$535,050 to \$864,648 (an increase of 61%), far outpacing the ACS estimates for median home value.

Based on the reported housing costs, the data below indicates the number of units that are currently affordable to households at different levels of AMI. It is important to note, that just because a unit is affordable to residents at that income level, it does not necessarily mean that a household at that income level is occupying the unit.

Cost of Housing

	Base Year: 2015	Most Recent Year: 2023	% Change
Median Home Value	360,900	862,206	42%
Median Contract Rent	1,323	2,293	58%

Table 10 – Cost of Housing

Monthly Rent

Monthly Rent (\$)	Efficiency (no bedroom)	1 Bedroom	2 Bedroom	3 Bedroom	4 Bedroom
Fair Market Rent (zip 92054)	1,930	2,100	2,650	3,570	4,340
High HOME Rent	1,779	1,907	2,291	2,638	2,923
Low HOME Rent	1,326	1,420	1,705	1,970	2,197

Table 13 – Monthly Rent

Data Source: HUD FMR and HOME Rents

Is there sufficient housing for households at all income levels?

No. Rent has increased 68% since 2010 and incomes, particularly incomes of very low-income renters and those on fixed incomes have not kept up with rent increases. There is a limited share of housing affordable to renters earning between 0-50% AMI when compared to the universe of households at those income levels. As documented in the Needs Assessment, there are nearly 10,575 renter households that earn between 0-50% AMI. However, as indicated in the table above, there are only 2,746 rental units affordable to households at this level.

This gap for renters is most significant at the 0-50% AMI range, as the total number of units affordable to households earning less than 80% AMI is 15,445 compared to 16,885 renter households at this level. However, this data does not take into account households earning more than 50% AMI who may be renting a unit that would be affordable to lower-income tenants or the quality and size of the units. Consequently, the need is likely greater than what is presented in this data.

Similarly, for owner households, there are 13,945 households who earn less than 50% AMI, but only 13,525 units affordable to this income level. Similarly, some of these units may be occupied by homeowners who earn more than 50% of AMI.

How is affordability of housing likely to change considering changes to home values and/or rents?

Both sales and rental prices have increased significantly over the past 10 years. According to the Zillow and Zumper data presented above – median sales price has increased by 39% in the past five years and monthly rental prices have increased by 24-39% (depending on unit size). Given the low unemployment rate and the high demand for housing throughout the metro area, the cost of housing is anticipated to continue to rise in the coming years. While this has the prospect of increasing wealth accumulation for current property owners, it will make it more difficult for low- and moderate-income households to find affordable, suitable housing in Oceanside.

How do HOME rents / Fair Market Rent compare to Area Median Rent? How might this impact your strategy to produce or preserve affordable housing?

The current rental rates provided by the Zumper data exceed fair market rents for both 1 and 2-bedroom units and is just below the fair market value for 3-bedroom units. As market rate prices continue to rise as anticipated, rental rates will likely continue to exceed fair market rates.

This scenario emphasizes the importance of preserving existing affordable housing as well as exploring opportunities and strategies to produce new housing within the City.

Discussion

Summary of housing costs included above.

MA-20 Housing Market Analysis: Condition of Housing – 91.210(a)

Introduction

Assessing housing conditions in the City provides the basis for developing strategies to maintain and preserve the quality of the housing stock. The ACS defines a “selected condition” as owner- or renter-occupied housing units having at least one of the following conditions: 1) lacking complete plumbing facilities; 2) lacking complete kitchen facilities; 3) more than one occupant per room; and 4) selected monthly housing costs greater than 30 percent of household income. Based on the definition of selected conditions, 35% of owner-occupied households in the City have at least one selected condition and 62% of all renter-occupied households in the City have at least one selected condition.

Describe the jurisdiction's definition of "standard condition" and "substandard condition but suitable for rehabilitation":

Substandard Housing: Housing is considered substandard when conditions are found to be below the minimum standard of living conditions defined in Section 17920.3 of the California Health and Safety Code. Households living in substandard conditions are considered to be in need of housing assistance, even if they are not seeking alternative housing arrangements, due to threat to health and safety. The household is considered suitable for rehabilitation if, through the City’s rehabilitation program, the property can meet the City the City’s Residential Rehabilitation Standards.

Standard Housing: Housing is considered Standard if it meets California Health and Safety Code and the City of Oceanside Building Code requirements.

Condition of Units

Condition of Units	Owner-Occupied		Renter-Occupied	
	Number	%	Number	%
With one selected Condition	12,250	36%	14,180	54%
With two selected Conditions	360	1%	,430	5%
With three selected Conditions	0	0%	10	0%
With four selected Conditions	0	0%	0	0%
No selected Conditions	21,530	63%	10,735	41%
Total	34,140	100%	26,355	100%

Risk of Lead-Based Paint Hazard

Risk of Lead-Based Paint Hazard	Owner-Occupied		Renter-Occupied	
	Number	%	Number	%
Total Number of Units Built Before 1980	13,220	39%	12,675	48%
Housing units built before 1980 with children present	5,610	16%	2,400	9%

Table 16 – Risk of Lead-Based Paint

Data Source: 2016-2020 ACS (Total Units) 2016-2020 CHAS (Units with Children present)

Vacant Units

	Suitable for Rehabilitation	Not Suitable for Rehabilitation	Total
Vacant Units	0	0	0
Abandoned Vacant Units	0	0	0
REO Properties	0	0	0
Abandoned REO Properties	0	0	0

Table 17 - Vacant Units

Note: The City of Oceanside does not maintain a database of the status of vacant and REO properties that are and are not suitable for rehabilitation. According to the 2016-2020 ACS estimates, the homeowner vacancy rate is 1.1% and the rental vacancy rate is around 3%). According to RealtyTrac on 2/25/2025, there are 6 REO properties within the City of Oceanside.

Need for Owner and Rental Rehabilitation

Housing units built over 30 years ago are more likely to need rehabilitation assistance. The majority of Oceanside housing stock is approaching or is in need of rehabilitation.

Estimated Number of Housing Units Occupied by Low or Moderate Income Families with LBP Hazards

Lead-based paint and varnishes were used in housing until 1978 and are still assumed to be present in the home unless the house has been fully remediated by a certified contractor.

Children age 6 and younger are at the highest risk for physical and mental damage from lead poisoning. Within Oceanside, nearly 26,000 housing units were constructed before 1980 (used as a proxy for 1978), accounting for 39% of the ownership housing stock and 48% of the rental stock. When evaluating the number of units with children aged 6 or younger, estimated 8,010 units are occupied by such households. According to the Needs Assessment, there are 9,084 households in Oceanside with children age 6 and younger. Thus, 88% of households with young children are assumed to live in housing units that may contain lead-based paint.

59% of all families with young children have incomes between 0-80% AMI. While the share of low- and moderate-income households is more likely to be in older housing stock in need of rehabilitation, even conservatively applying this share of 59% to the total number of units built before 1980 with young children present (8,010), we can estimate that 4,726 households are potentially at risk of living with lead-based paint hazards.

However, it is important to note that this data does not necessarily reflect households in which young children visit frequently such as grandparents, informal day care centers, or other family members and friends and thus the risk is likely even greater.

Discussion

Unaccompanied Youth	8	6	10	15	4

Table 20 - Facilities and Housing Targeted to Homeless Households

Describe mainstream services, such as health, mental health, and employment services to the extent those services are used to complement services targeted to homeless persons

City of Oceanside-Specific Programs and Facilities for Homeless Populations

The City of Oceanside provides a comprehensive range of services and facilities to address the diverse needs of homeless individuals and families. These programs focus on vulnerable populations, including chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth. The services and facilities outlined below are part of a coordinated approach with regional partners, many of which are detailed in SP-40 Institutional Delivery Structure and MA-35 Special Needs Facilities and Services.

List and describe services and facilities that meet the needs of homeless persons, particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth. If the services and facilities are listed on screen SP-40 Institutional Delivery Structure or screen MA-35 Special Needs Facilities and Services, describe how these facilities and services specifically address the needs of these populations.

City of Oceanside-Specific Programs and Facilities for Homeless Populations

The City of Oceanside provides a comprehensive range of services and facilities to address the diverse needs of homeless individuals and families. These programs focus on vulnerable populations, including chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth. The services and facilities outlined below are part of a coordinated approach with regional partners, many of which are detailed in SP-40 Institutional Delivery Structure and MA-35 Special Needs Facilities and Services.

1. Services and Facilities for Chronically Homeless Individuals and Families

Chronically homeless individuals and families often require long-term housing solutions with integrated supportive services. Oceanside's programs include:

- **Permanent Supportive Housing (PSH):** Offers stable housing with wraparound services, including mental health care, substance use counseling, and life skills training. These facilities provide long-term solutions for individuals with disabling conditions.
- **Emergency Shelter Programs:** Provide immediate relief and a pathway to permanent housing. Shelters include access to hygiene services, case management, and health referrals.
- **Street Outreach Services:** Dedicated teams engage unsheltered individuals to connect them with housing resources and healthcare services. Outreach focuses on those living in encampments, vehicles, or other non-traditional shelters.

These services directly address chronic homelessness by providing stability and long-term solutions that go beyond emergency interventions.

2. Services and Facilities for Families with Children

Families experiencing homelessness in Oceanside have access to targeted services designed to maintain family unity, ensure children's education, and promote long-term housing stability:

- **Family Emergency Shelters:** Provide safe and private accommodation for parents and children. Services include case management, employment assistance, and connections to educational resources for children.

- **Transitional Housing:** Temporary housing options help families stabilize while seeking permanent solutions. Families receive support for job training, financial literacy, and childcare.
- **Rapid Rehousing Programs:** Offer rental assistance and supportive services to quickly transition families into stable housing and prevent long-term shelter stays.
- **Food and Material Assistance:** Programs provide food distribution, clothing vouchers, and hygiene supplies to support families in crisis.

These services focus on preventing the cycle of homelessness among children and ensuring family well-being.

3. Services and Facilities for Veterans and Their Families

Veterans experiencing homelessness face distinct challenges, including service-related disabilities and difficulties reintegrating into civilian life. Oceanside provides specialized services for this population:

- **Veteran-Specific Housing:** Permanent supportive housing units are designated for veterans, with case management services that address physical health, mental health, and employment barriers.
- **Veteran Outreach and Navigation:** Specialized outreach teams connect veterans to housing resources, VA benefits, and supportive services.
- **Employment Support for Veterans:** Workforce development programs assist veterans in gaining employment, with services tailored to address unique barriers faced by former service members.
- **Mental Health Services for Veterans:** Access to counseling and peer support groups helps veterans address service-related trauma and other mental health concerns.
- **Veteran-specific services ensure that those who have served receive comprehensive support tailored to their unique needs.**

4. Services and Facilities for Unaccompanied Youth

Unaccompanied youth experiencing homelessness face risks of exploitation, educational disruption, and long-term instability. Oceanside offers youth-specific services that prioritize safety and long-term stability:

- **Youth Shelters and Transitional Housing:** Provide temporary housing with access to case management, educational support, and life-skills training.
- **Youth Outreach Programs:** Engage homeless youth living on the streets to connect them with safe housing options and supportive services.
- **Education and Employment Services:** Programs help youth re-engage in school or find employment, supporting long-term self-sufficiency.
- **Behavioral and Mental Health Support:** Access to counseling services helps youth address trauma and improve mental well-being.
- **Youth-focused services ensure early intervention and support the transition to stable adulthood.**

MA-35 Special Needs Facilities and Services – 91.210(d)

Introduction

Special needs populations consist of persons who are not homeless but due to various reasons are in need of services and supportive housing. Persons with special needs include, but are not limited to, the elderly, frail elderly, severe mentally ill, developmentally disabled, physically disabled, persons with alcohol or other drug addictions, persons with HIV/AIDS and victims of domestic violence. The City of Oceanside will consider allocating CDBG public service funding to various programs that provide services to special needs populations, including but not limited to those serving the elderly, frail elderly, developmentally disabled, physically disabled, mentally disabled, persons with HIV/AIDS and victims of domestic violence.

HUD defines elderly as a person who is 62 years of age or older. A frail elderly person is an elderly person who is unable to perform at least three activities of daily living including eating, bathing, or home management activities. Generally, elderly persons have lower incomes than the population at large.

HUD defines a disabled person as having a physical or mental impairment that substantially limits major life activities. The obstacle to independent living for these adults is not only their disability, but also the lack of financial resources. Additionally, persons with disabilities have high dependency on supportive services and may require accessibility modifications to accommodate their unique conditions.

Drug abuse or substance abuse is defined as the use of chemical substances that lead to an increased risk of problems and an inability to control the use of the substance. According to the Centers for Disease Control and Prevention, there were 70,237 drug overdose deaths in the United States in 2017 and that of those deaths, 47,600 involved opioids. According to the CDC, the national 'opioid epidemic' began in the 1990s with increased prescribing of opioids such as Methadone, Oxycodone, and Hydrocodone. Beginning in 2010, CDC reported rapid increases in overdose deaths involving heroin. The third wave began in 2013 with increases in overdose deaths involving synthetic opioids such as the illicitly manufactured fentanyl, often found in combination with heroin, counterfeit pills, and cocaine. Although California was among 10 states with the lowest drug overdose mortality in each year from 2014-2017, the proliferation of fentanyl is a significant and relatively new issue requiring increased public awareness and services.

Human immunodeficiency virus infection (HIV) is a virus that weakens one's immune system by destroying important cells that fight diseases and infection. Acquired Immune Deficiency Syndrome (AIDS) is the final stage of the HIV infection. Domestic Violence includes, but is not limited to, felony or misdemeanor crimes of violence committed by a current or former spouse of the victim or by a person who is cohabitating with or has cohabited with the victim as a spouse.

Public housing residents, including seniors, individuals with disabilities, and low-income families, benefit from on-site supportive services that focus on financial literacy, employment readiness, and access to childcare. Resident service coordinators within public housing developments connect tenants to essential community resources, which help prevent eviction and foster stability.

The City prioritizes several vulnerable populations, including unaccompanied youth, veterans, survivors of domestic violence, and families with children. Unaccompanied youth have access to specialized shelters and educational support programs that help them transition to independent living. Veterans require targeted services to address trauma related to their service, as well as challenges with employment and long-term housing needs. Families, especially those with children, need stable housing accompanied by supportive services that focus on childcare, education, and economic stability.

The supportive housing services mentioned above align with the SP-40 Institutional Delivery Structure and the MA-35 Special Needs Facilities and Services frameworks. These frameworks promote a comprehensive approach that includes emergency shelters, transitional housing, and permanent supportive housing (PSH) tailored to the specific needs of different populations. Key components such as

integrated healthcare services, behavioral health support, and employment assistance ensure holistic care and sustainable housing solutions.

The City of Oceanside is committed to developing and expanding supportive housing programs that meet the immediate needs and promote long-term stability for its most vulnerable residents. Through a coordinated, person-centered approach, the City collaborates closely with regional partners, healthcare providers, and community organizations to ensure that every individual, regardless of their circumstances, has access to housing and the supportive services needed to improve their quality of life.

Including the elderly, frail elderly, persons with disabilities (mental, physical, developmental), persons with alcohol or other drug addictions, persons with HIV/AIDS and their families, public housing residents and any other categories the jurisdiction may specify, and describe their supportive housing needs

The City of Oceanside addresses the diverse, supportive housing needs of its vulnerable populations, including the elderly, frail elderly, persons with disabilities (mental, physical, and developmental), individuals with substance use disorders, persons with HIV/AIDS, and their families, public housing residents, and those returning from mental and physical health institutions. Comprehensive supportive services are essential for these populations to achieve housing stability, maintain their health, and improve overall well-being.

The elderly and frail elderly face significant housing challenges related to fixed incomes, rising living costs, and increased healthcare needs. These individuals require accessible housing with age-friendly designs and on-site services, including chronic disease management, personal care assistance, transportation services, and opportunities to reduce social isolation. Similarly, individuals with disabilities whether physical, mental, or developmental disability require supportive housing that accommodates mobility limitations and offers behavioral health services, vocational support, and personal care. Accessible units with comprehensive case management are vital in ensuring these individuals can maintain independence and stability.

Individuals struggling with substance use disorders need housing solutions that incorporate addiction treatment and recovery support. Stable housing, along with substance use counseling, peer support groups, and relapse prevention programs, is crucial for long-term recovery and maintaining housing stability. Additionally, people living with HIV/AIDS and their families encounter unique challenges that require access to medical care, mental health counseling, nutritional support, and comprehensive case management to effectively address their health and housing needs.

Public housing residents, including seniors, individuals with disabilities, and low-income families, benefit from on-site supportive services that focus on financial literacy, employment readiness, and access to childcare. Resident service coordinators within public housing developments connect tenants to essential community resources, which help prevent eviction and foster stability. As indicated in the needs assessment, special needs populations, on average, have lower incomes than the population as a whole and demonstrate a greater need for supportive services and housing assistance.

Specific needs include:

Fair Housing Assistance: Special needs populations may face discrimination when seeking new housing or in facing pressure from landlords or lending institutions. Providing services associated with fair housing (including education and advocacy activities)

Affordable, accessible housing: Special needs populations comprise a greater share of the low- and moderate-income population within Oceanside and, as such, have a greater need for affordable housing – including accessible housing for elderly and disabled households.

Mental Health and Healthcare Services: Special needs populations have greater need for general healthcare services including mental health and substance abuse facilities and services.

Accessible public facilities: Elderly and disabled individuals require public facilities and services to be ADA compliant to enable them to effectively access services and programs throughout the City. Oceanside has emphasized the importance of increasing ADA accessibility throughout public facilities in the City.

Public services: Special needs populations require supportive services such as transportation, education, senior services, childcare and basic needs.

Describe programs for ensuring that persons returning from mental and physical health institutions receive appropriate supportive housing

The City prioritizes several vulnerable populations, including unaccompanied youth, veterans, survivors of domestic violence, and families with children. Unaccompanied youth have access to specialized shelters and educational support programs that help them transition to independent living. Veterans require targeted services to address trauma related to their service, as well as challenges with employment and long-term housing needs. Families, especially those with children, need stable housing accompanied by supportive services that focus on childcare, education, and economic stability.

The supportive housing services mentioned above align with the SP-40 Institutional Delivery Structure and the MA-35 Special Needs Facilities and Services frameworks. These frameworks promote a comprehensive approach that includes emergency shelters, transitional housing, and permanent supportive housing (PSH) tailored to the specific needs of different populations. Key components such as integrated healthcare services, behavioral health support, and employment assistance ensure holistic care and sustainable housing solutions.

The City of Oceanside is committed to developing and expanding supportive housing programs that meet the immediate needs and promote long-term stability for its most vulnerable residents. Through a coordinated, person-centered approach, the City collaborates closely with regional partners, healthcare providers, and community organizations to ensure that every individual, regardless of their circumstances, has access to housing and the supportive services needed to improve their quality of life.

Specify the activities that the jurisdiction plans to undertake during the next year to address the housing and supportive services needs identified in accordance with 91.215(e) with

respect to persons who are not homeless but have other special needs. Link to one-year goals. 91.315(e)

See below for activities.

For entitlement/consortia grantees: Specify the activities that the jurisdiction plans to undertake during the next year to address the housing and supportive services needs identified in accordance with 91.215(e) with respect to persons who are not homeless but have other special needs. Link to one-year goals. (91.220(2))

During this Consolidated Plan cycle, the City of Oceanside will prioritize activities to address housing and supportive services of its residents.

- To discourage discrimination, the City will contract with the CSA San Diego County or a similar Fair Housing Agency to provide a variety of fair housing services and landlord tenant counseling.
- Prioritize public services that provide homeless assistance and wrap around services to homeless, low-income residents and other special needs populations.
- Use public facility and infrastructure funding to improve ADA accessibility throughout the City

The City will continue to maintain a database of service providers operating in Oceanside and San Diego County that prioritize services and programs for special needs populations.

MA-40 Barriers to Affordable Housing – 91.210(e)

Negative Effects of Public Policies on Affordable Housing and Residential Investment

The City regulates the use of land within the City limits through the General Plan, the Zoning Ordinance, and Building Codes. The General Plan guides all future development by providing overall densities and development policies for all areas of the community. Zoning has been used as a site-specific tool to derive the density and intensity of proposed land uses.

Within the City of Oceanside, the city strives to limit public policies that may adversely impact the construction or preservation of affordable housing and residential investment. The City collaborates with other jurisdictions throughout San Diego County to produce a regional Analysis of Impediments to Fair Housing Choice.

DRAFT

MA-45 Non-Housing Community Development Assets – 91.215 (f)

Introduction

The City of Oceanside has a broad-based local economy that accommodates a wide range of 21st century industry sectors, including the following:

- Sports and active lifestyle products
- Biotechnology
- Information / communication technology
- Healthcare
- Cleantech
- Precision manufacturing
- Hospitality
- Agriculture and agrotourism

According to the 2022 Longitudinal Employer Household Dynamics (LEHD) profile, there are 42,318 private jobs within the City of Oceanside. Of these jobs, 12,209 (28.9%) are filled by Oceanside residents. Likewise, 56,200 Oceanside residents commute outside of the City for employment. For those commuting to Oceanside for employment, the greatest share come from Carlsbad (14.7%), 14.2% in the City of San Diego, 6.5% in Vista, and 4% in San Marcos. LEHD defines a primary job as the job earning the individual the most money. This is a way of accounting for the fact that workers (an estimated 10% of Oceanside residents) work multiple jobs.

According to the State of California Economic Development Department, in February 2025, the unemployment rate in Oceanside was 4.3%, which is below the long-term average of 6%.

As documented in the tables below, Oceanside's labor force has a relatively high rate of educational attainment. The largest share of the labor force is those with some college or an associate's degree (25,280 individuals) followed by those with a bachelor's degree or higher (19,480 individuals).

Based on the Business Activity table above, what are the major employment sectors within your jurisdiction?

In reviewing the Business Activity table, the largest sectors of jobs based in Oceanside are Arts, Entertainment and Accommodations (6,555 jobs), Retail Trade (5,816), Education and Health Care Services (4,337), and Manufacturing (3,945). For residents of Oceanside, the largest sectors in which they work (in Oceanside or outside of Oceanside) are Arts, Entertainment and Accommodations (9,806 workers), Education and Health Care Services (8,142), Retail Trade (7,461), and Manufacturing (6,789). The sectors of jobs based in Oceanside and current jobs of residents of Oceanside closely align in regards to sector. However, according to the LEHD database, in 2017 there were 31,873 private jobs in Oceanside. However, only 8,597 residents worked within the City – the remaining jobs were filled by individuals commuting into the City. Likewise, in 2017 49,610 residents of Oceanside commuted outside of the City for work.

The City's largest employers are documented below:

Private Employers

- Genentech Pharmaceuticals
- Scripps Jefferson
- Hydranautics
- Hobie Cat

Public Employers

- Oceanside Unified School District
- San Diego County
- Camp Pendleton
- City of Oceanside
- MiraCosta Community College
- North County Transit District
- Tri-City Medical Center

Describe the workforce and infrastructure needs of the business community:

The City's workforce needs continue to be geared to a trained and available workforce to meet growing business needs in the City.

Like many cities throughout the country and state, parts of Oceanside infrastructure are aging and/ or at capacity for the number of residents. Through the Economic Development Element and the Capital Improvement Project, the City is exploring multiple funding mediums to maintain and expand the City's infrastructure to meet the residential and business needs – including transportation systems, streets, open space, and utility infrastructure.

Describe any major changes that may have an economic impact, such as planned local or regional public or private sector investments or initiatives that have affected or may affect job and business growth opportunities during the planning period. Describe any needs for workforce development, business support or infrastructure these changes may create.

Through much of the 20th century, Oceanside served predominately as a bedroom community for job centers to the south (San Diego), north (Orange County/ Los Angeles County), and Camp Pendleton. Through the 21st century, the City has prioritized economic growth in the City targeting growth in a range of sectors including biotechnology/life sciences, information/communication technology, warehousing, and light manufacturing. Additionally, the City continues to increase its hospitality industry by developing and refurbishing amenities to attract visitors to the City as well as agricultural and agritourism.

As documented in the City's Economic Development element, the City will continue to prioritize growth in these industry sectors to continue to broaden and strengthen the City's economic presence in the San Diego region. Major industry expansions over the last five years that have brought new, quality jobs to Oceanside include:

- Beachfront resorts opening in 2021 bringing approximately 300 new jobs
- Scripps Jefferson healthcare facility opening in 2022 bringing approximately 150 new jobs
- Genentech \$450 million expansion scheduled to open in 2025 bringing approximately 60 new jobs

How do the skills and education of the current workforce correspond to employment opportunities in the jurisdiction?

As documented in the Economic Development element, the San Diego region is identified as a region with relative strengths in the following industries:

- Military/ Defense
- Biotechnology/ Life Science

- Information Technology
- Tourism
- Maritime
- Healthcare

Throughout the San Diego region, there are a range of education and training programs to ensure that employees have the requisite skills and expertise to meet the employment demands within the region. As described in more detail below, Oceanside is home to MiraCosta Community College and UEI College. Through its programs, potential employees and current employees can develop or advance their skill sets through a range of in-person and remote degree and certificate programs.

Describe any current workforce training initiatives, including those supported by Workforce Investment Boards, community colleges and other organizations. Describe how these efforts will support the jurisdiction's Consolidated Plan.

The City of Oceanside partners closely with Mira Costa College and Cal State San Marcos to ensure that relevant and adequate job training is available to residents. MiraCosta Community College offers professional development and technical training courses through its Technology Career Institute. MiraCosta offers a number of certificate and degree programs that are tailored to the local economy including biotechnology, health care, and information technology. UEI College includes vocational programs in the areas of electrician technician, automotive repair and healthcare fields.

Through the Consolidated Plan, the City of Oceanside will prioritize community services, facilities, and housing to complement ongoing economic development activities led by other city agencies.

Does your jurisdiction participate in a Comprehensive Economic Development Strategy (CEDS)?

The Economic Development Element of the City's General Plan, which was approved in 2019, serves as the Comprehensive Economic Development Strategy.

If so, what economic development initiatives are you undertaking that may be coordinated with the Consolidated Plan? If not, describe other local/regional plans or initiatives that impact economic growth.

The City of Oceanside works closely with the San Diego Regional Economic Development Council on regional economic development initiatives, including the Innovate78 regional

economic development collaboration between the cities of Oceanside, Carlsbad, Vista, San Marcos and Escondido. The collaboration identifies opportunities for job growth and local investment on a regional level with the understanding that residents throughout North County access jobs and educational opportunities across city borders.

The City of Oceanside's Economic Development Division has been working on implementing the Oceanside Sustainable Tourism Master Plan with four pillars to encourage Tourism and agrotourism in Oceanside:

- Environmental; quality
- Resident quality of life
- Quality of economy
- Visitor quality experience

Discussion

Summary of non-housing market conditions included above.

MA-50 Needs and Market Analysis Discussion

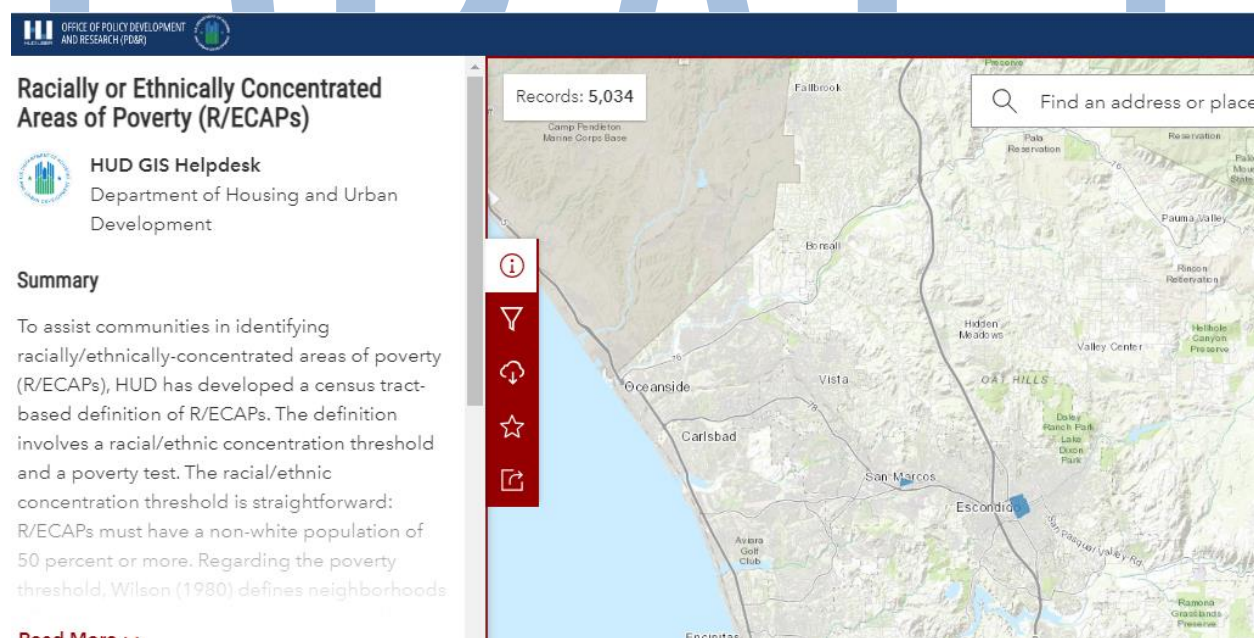

Are there areas where households with multiple housing problems are concentrated? (include a definition of "concentration")

As noted in the needs assessment, 36% all households earning below 100% AMI experience at least one housing problem (most commonly housing cost burden). These households experiencing problems are located throughout the City and are not concentrated in a single neighborhood or geography.

Consistent with the Oceanside Housing Element, HCD, and HUD's definition of a Racially/ Ethnically Concentrated Area of Poverty (R/ECAP) is:

- A census tract that has a non-White population of 50 percent or more (majority- minority) or, for non-urban areas, 20 percent, and a poverty rate of 40 percent or more; or
- A census tract that has a non-white population of 50 percent or more (majority- minority) and the poverty rate is three times the average tract poverty rate for the County, whichever is lower.

Per the HUD GIS Helpdesk Oceanside does not have any qualified R/ECAPs.

Are there any areas in the jurisdiction where racial or ethnic minorities or low-income families are concentrated? (include a definition of "concentration")

The City of Oceanside defines areas of minority concentration as areas in which the share of the minority population is more than 20 percentage points that of the City's total minority population (51.7%). Within Oceanside, six Census tracts have a minority concentration greater than 71.7%.

1. Two tracts are located in the northwest area of the City (surrounding Libby Lake Park)
2. Two tracts bound by I-5, Route 76, Oceanside Blvd and North Canyon Drive.
3. Two tracts in the southern edge of the City (bound by the City's borders, College, Blvd, and Olive Dr).

Individually, the plan defines low-income areas as Census tracts in which at least 40% of the individuals within the tract are living at or below the poverty line. There are no such Census tracts within the City of Oceanside.

What are the characteristics of the market in these areas/neighborhoods?

These areas/ neighborhoods tend to have reduced housing value and housing stock that has a greater need for rehabilitation/ repairs. The housing in these areas are primarily multi-family rental units. As previously discussed, renter households with lower incomes experience housing problems at a higher rate than households with higher incomes. This is indicative of a high rate of need for housing assistance in these areas.

Are there any community assets in these areas/neighborhoods?

There are tremendous human and physical assets in these areas and throughout the City of Oceanside. Each neighborhood throughout the City contains a diverse profile of assets and community services including community centers, retail nodes, public transit services, open space and other community benefits. Through the Consolidated Plan and other planning and investment processes, the City prioritizes maintaining and improving these benefits and services for all residents, especially those who residents who have a greater need for services and programming. Located in lower- and moderate-income areas are the services agencies which follow:

- Salvation Army
- HeadStart
- CSA San Diego
- Vista Community Clinic
- TrueCare
- Women's Resource Center
- North County Lifeline
- Interfaith Community Services
- Boys & Girls Club of Vista
- Serving Seniors
- Mental Health Systems

Are there other strategic opportunities in any of these areas?

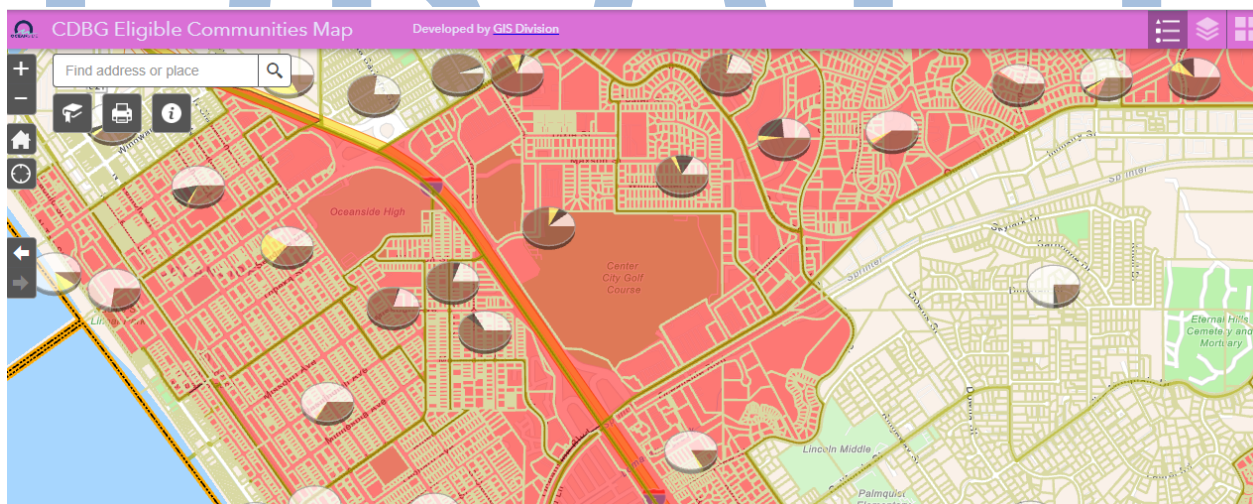

The City will continue to collaborate with the agencies and surrounding communities in the North County area to ensure services and programs are delivered in a cost-effective manner and provide assistance to those who are most in need. There are no readily apparent strategic opportunities to be addressed with CDBG funds specific to any of these neighborhoods. The City will continue to fund and target HUD resources to meet community needs and leverage other funding resources.

Are there areas where households with multiple housing problems are concentrated? (include a definition of "concentration")

Concentrated housing refers to areas with high poverty rates or racially/ethnically concentrated areas of poverty. Areas of concentration in Oceanside reflect older more dense communities such as the Downtown area, Crown Height community and Eastside

Are there any areas in the jurisdiction where racial or ethnic minorities or low-income families are concentrated? (include a definition of "concentration")

The City of Oceanside has a GIS CDBG map (<https://www.ci.oceanside.ca.us/residents/city-services/city-gis-maps>) that identifies CDBG eligible block groups and the racial/ethnic mix of the community is also identified. Oceanside defines a minority concentration area is a geographic area with a large percentage of people from a racial or ethnic minority group.

What are the characteristics of the market in these areas/neighborhoods?

The market in these areas offers more affordable options to low-income renters. Low-income communities have more Housing Choice Vouchers by census tract compared to other regions. Overcrowding is also a concern for those areas. Overcrowding signals that the market does not have enough options to accommodate large families or enough affordable options for single people, such as studios or one-bedrooms.

Are there any community assets in these areas/neighborhoods?

There are several community assets in these areas. Recreation center, parks, pools, libraries, and other community centers where the community can gather.

Are there other strategic opportunities in any of these areas?

The City constantly monitors Federal and State resources to determine any new strategic opportunities for these communities.

DRAFT

MA-60 Broadband Needs of Housing occupied by Low- and Moderate-Income Households - 91.210(a)(4), 91.310(a)(2)

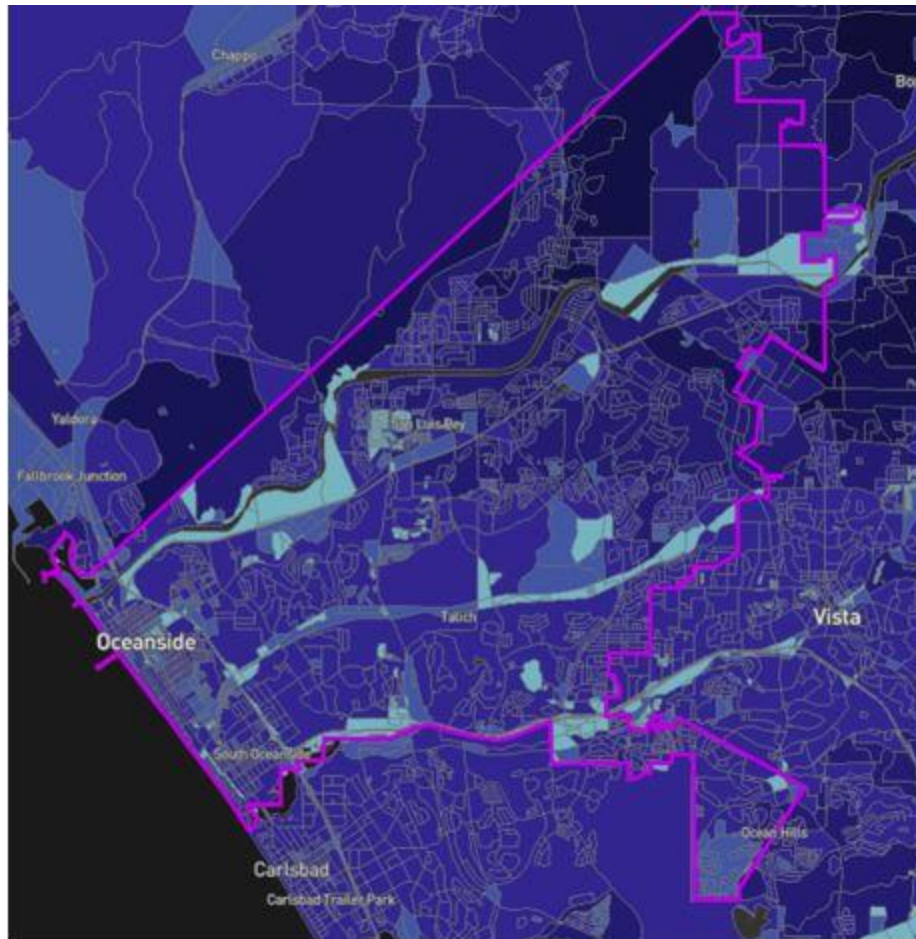

Describe the need for broadband wiring and connections for households, including low- and moderate-income households and neighborhoods.

All residences and small businesses in Oceanside may access to fixed and mobile broadband. Internet Service Providers (ISP) self-report to the Federal Communications Commission on broadband availability throughout the county. Fixed broadband goes to homes and small businesses using fiber, cable, DSL, satellite, and fixed wireless technology. Mobile broadband is stationary coverage outdoors and mobile in-vehicle coverage. The FCC National Broadband Map shows, that as of June 2023 fixed internet access was available at four different download/upload speeds ranging from 0.2/ 0.2 Mbps to 100/ 20 Mbps and mobile access is available at the three fastest download/upload rates available 4G 5/1 Mbps, 5G-NR 7/1 Mbps, and 5G-NR 35/3 Mbps. The FCC offered financial assistance to help households with low-income afford access to the internet. Throughout the City of Oceanside, residents have consistent and multiple options to access broadband, high-speed internet. For broadband download speeds of 25 megabytes per second (mbps), 97.8% of residents are serviced by at least three internet service providers and 2.2% are serviced by two internet service providers. For download speeds of 100 mbps, 67.4% of residents are serviced by two internet service providers, 29.4% of residents are serviced by one provider, and 3.2% of residents do not have access to internet at this speed. According to broadbandnow, the average download speed in Oceanside is 66.92 mbps which is 120% faster than the average internet speed in California.

Oceanside complies with HUD's Narrowing the Digital Divide Through Installation of Broadband Infrastructure in HUD-Funded New Construction and Substantial Rehabilitation of Multifamily Rental Housing (81 FR 92626) rule (effective January 19, 2017). Through this rule, all new HUD-funded multi-family construction or substantial rehabilitation has included broadband infrastructure including cables, fiber optics, wiring and wireless connectivity to ensure that each unit has the infrastructure to achieve at least 25 mbps download and 3 mbps upload speeds.

Describe the need for increased competition by having more than one broadband Internet service provider serve the jurisdiction.

Throughout the city, residents are serviced by two, oftentimes at least three internet service providers who offer high speed internet. The three primary service providers in Oceanside are Cox, ATT and Earthlink.

Number of Fixed Residential Broadband Providers

MA-65 Hazard Mitigation - 91.210(a)(5), 91.310(a)(3)

Describe the jurisdiction's increased natural hazard risks associated with climate change.

Climate change has increased the prevalence and severity of natural hazard risks including, drought, flash floods / storms, and extreme heat events in Oceanside. To help counter the impact of these risks, the City adopted a new Climate Action Plan in 2019. This plan establishes a series of implementation approaches and metrics to both mitigate the City's impact on overall climate change, as well as local strategies to mitigate the impact on residents and businesses.

The guide can be accessed here:

<https://www.ci.oceanside.ca.us/civicax/filebank/blobdload.aspx?BlobID=50403>

Describe the vulnerability to these risks of housing occupied by low- and moderate-income households based on an analysis of data, findings, and methods.

Low- and moderate-income residents and special needs populations are especially vulnerable to the risks of climate-related hazard risks. The residences of low- and moderate-income households are more often in worse condition and thus are more susceptible to external weather conditions such as extreme heat. Most of the lower-income households are not in areas at risk of wildfires or flooding. Although not affected by climate change, the greatest concern is earthquakes, which would affect low- and moderate-income households since much of the housing units were constructed prior to current building standards.

Nearly 50% of the survey respondents did not feel adequately prepared for a natural disaster such as earthquakes and wildfires. The City of Oceanside has developed a disaster preparedness resource bank which provides essential tips on what to do before, during and after natural disasters. This comprehensive guide includes emergency kit checklists and preparedness resources and guidance material. The guide can be accessed here:

https://www.ci.oceanside.ca.us/gov/fire/div/disaster_preparedness_/default.asp

Strategic Plan

SP-05 Overview

Strategic Plan Overview

development priorities, strategies and goals for the investment of Community Development Block Grant (CDBG) and HOME Investment Partnerships Program (HOME) funds from the U.S. Department of Housing and Urban Development (HUD) over the next five years, beginning July 1, 2025 and ending June 30, 2030. The priority needs and goals established in this Strategic Plan are based on analysis of information including the results of the City's 2025 - 2029 Consolidated Plan Community Needs Survey and housing and community development data elements required by HUD in the online Consolidated Plan system (the eCon Planning Suite) from the 2016-2020 American Community Survey (ACS) 5-Year Estimates and the Comprehensive Housing Affordability Strategy (CHAS) covering the same time period. Additional sources of information used to identify needs and establish priorities were obtained through consultation with local nonprofit agencies involved in the development of affordable housing and the delivery of public services to low- and moderate-income people, persons with special needs and those at risk of homelessness.

In consideration of community input and available data, the seven priority needs listed below are established as part of this Plan.

1. Expand Affordable Housing
2. Maintain Existing Housing Stock
3. Homeless Services and Facilities
4. Barriers to Accessible Facilities and Infrastructure
5. Update and expand public facilities and infrastructure
6. Support Community Needs and Programming
7. Ensure equal access to housing opportunities

Consistent with HUD's national goals for CPD programs to provide decent housing opportunities, maintain a suitable living environment and expand economic opportunities for low- and moderate-income residents, the priority needs listed above will be addressed over the next five years through the implementation of CPD funded activities aligned with the following seven measurable Strategic Plan goals:

- Affordable Housing Development and Preservation
- Fair Housing Services
- Public Services
- Special Needs Services and Facilities
- Public Facilities and Infrastructure
- Administration and Section 108 Loan Repayment

	Include specific housing and commercial characteristics of this target area.	Citywide area.
	How did your consultation and citizen participation process help you to identify this neighborhood as a target area?	All consultation and citizen participation activities informed the City's planned activities.
	Identify the needs in this target area.	See Needs Assessment and Priority Needs.
	What are the opportunities for improvement in this target area?	See Strategic Goals.
	Are there barriers to improvement in this target area?	Limited funding available to address all needs.

General Allocation Priorities

Describe the basis for allocating investments geographically within the jurisdiction (or within the EMSA for HOPWA)

The City of Oceanside does not prioritize or target HUD CDBG and HOME funds in specific neighborhoods or districts. Funding for both programming is made available to residents throughout the City. CDBG projects that target a neighborhood or area must HUD's requirements that at least 51% of the residents are LMI persons. The map below identifies all Census block groups that meet the 51%

threshold.

DRAFT

SP-25 Priority Needs - 91.215(a)(2)

Priority Needs

Table 29 – Priority Needs Summary

DRAFT

1	Priority Need Name	Expand Affordable Housing
	Priority Level	High
	Population	Extremely Low Low Moderate
	Geographic Areas Affected	Citywide
	Associated Goals	Affordable Housing Development and Preservation Administration & Section 108 Repayment
	Description	Increase the supply of affordable housing for low-income individuals, families, persons with special needs, and persons experiencing homelessness or at-risk of homelessness. Based on evaluation of ACS and CHAS data, there is a high need for additional rental housing units affordable for households earning less than 80 percent of AMI. Of the renter households earning 0-80 percent of AMI, 12,390 are cost burdened households — meaning households paying more than 30 percent of their income for housing. Additionally, nearly half of these cost burdened households (6,165) are considered severely cost burdened households — meaning that they pay more than 50 percent of their income for housing.
	Basis for Relative Priority	The development of rental housing units affordable for low- and moderate-income households is rated as a high priority need because more than 5,000 renter households earn less than 50% AMI and are severely cost burdened, making these households the most at risk of homelessness. Additionally, responses to the Community Survey and input from multiple stakeholders indicate the significant need for additional affordable housing units in Oceanside.
2	Priority Need Name	Maintain Existing Housing Stock
	Priority Level	High
	Population	Extremely Low Low Moderate
	Geographic Areas Affected	Citywide

See priority needs above.

DRAFT

SP-30 Influence of Market Conditions – 91.215 (b)

Influence of Market Conditions

Affordable Housing Type	Market Characteristics that will influence the use of funds available for housing type
Tenant Based Rental Assistance (TBRA)	Despite rising housing costs in parts of the City, Tenant-Based Rental Assistance has successfully assisted 91 households access affordable rental properties in multiple neighborhoods in the City such as the area surrounding Libby Lake and in the Eastside. It is anticipated that the City will continue to fund TBRA in the 5-year Consolidated Plan cycle.
TBRA for Non-Homeless Special Needs	Non-homeless special needs households are encouraged to participate in the City's TBRA program. A number of community-based organizations assist in providing wrap around services and programming for special needs populations.
New Unit Production	Based on land and development costs and the current level of development in Oceanside, there is limited opportunity for new unit production. However, the City actively monitors potential sites that may be suitable for multi-family development and allow multiple funding sources (such as HOME, Inclusionary funding, and State resources) to support the development of new units. The City complies with AB1486 and AB1255, in which it consistently monitors state and municipal land to identify potential underutilized lots that could be used for affordable housing development.
Rehabilitation	The City will invest CDBG funds in the Residential Rehabilitation Program as a cost-effective means of preserving the supply of ownership housing. Preservation of the physical and functional integrity of existing housing units occupied by low- and moderate-income households is a cost-effective way to invest limited resources to retain existing housing units that are already affordable to low- and moderate-income households in the community. Given the age of the housing stock in Oceanside as documented in the Market Analysis, rehabilitation is a cost-effective measure to preserve housing for low- and moderate-income households.
Acquisition, including preservation	The City will consider applications from affordable housing nonprofit organizations including Community Housing Development Organizations to use CDBG or HOME resources during the period of this Consolidated Plan to acquire or preserve housing units to create additional affordability in the community. The City will directly engage in communications with owners and/ or managers of current affordable housing in the City to identify potential strategies and approaches to preserve those units.

Table 30 – Influence of Market Conditions

The City may also pursue acquisition/ rehabilitation of multi-family housing and deed-restrict the improved units as affordable housing.

SP-35 Anticipated Resources - 91.215(a)(4), 91.220(c)(1,2)

Introduction

To determine anticipated resources the City of Oceanside utilizes current CDBG and HOME funding and projects that forward for the duration of this Consolidated Plan cycle. With the uncertainty of funding and projected funding cuts at the Federal level staff has projected a 25% cut of federal funds to what we would typically anticipate receiving. The annual allocations are subject to federal appropriations and changes in demographic data used in HUD's formulas for each respective program. The City's fiscal year 2025 Action Plan will lay out how use of the annual allocations to address the priority needs and achieve the goals defined in the During the five-year period of the Consolidated Plan from July 1, 2025, to June 30, 2029, the City of Oceanside anticipated investing an estimated \$4.8 million in CDBG and 1.6 million in HOME funds (based on presumed 25% funding cuts) to support the goals of the Consolidated Plan and the goals of this Strategic Plan.

Funding Source	Current 1-Year Estimate	25% 1-Year Estimated	25% 5-Year Estimate
CDBG	\$1,284,844	\$963,633	\$4,818,165
HOME	\$512,501	\$326,872	\$1,634,360
Combined HUD 5-Year			\$^452,525

Anticipated Resources

Program	Source of Funds	Uses of Funds	Expected Amount Available Year 1				Expected Amount Available Remainder of ConPlan \$	Narrative Description
			Annual Allocation: \$	Program Income: \$	Prior Year Resources: \$	Total: \$		
CDBG	public - federal	Acquisition Admin and Planning Economic Development Housing Public Improvements Public Services	\$963,633	\$66,630	\$0	\$1,030,263	\$3,854,532	Funding includes 2025 allocation as well as prior year resources and program income. Note: Shares of program income and prior year resources can be allocated to Administration and Public Service Activities
HOME	public - federal	Acquisition Homebuyer assistance Homeowner rehab Multifamily rental new construction Multifamily rental rehab New construction for ownership TBRA	\$326,872	\$184,968	\$738,622	\$1,250,462	\$1,307,488	Funding includes 2025 allocation as well as prior year resources and program income.

Table 31 - Anticipated Resources

Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied

City of Oceanside is expected to receive HOME funding which can be leveraged with CDBG funding if used for affordable housing and housing rehabilitation. The City will leverage HOME

funding if future projects are presented during the next five years. The HOME program requires a 25 percent match based on fund expenditure, unless a jurisdiction meets the thresholds to have the match requirements reduced; those threshold conditions are: 1) Fiscal distress; 2) Severe fiscal distress, and 3) Presidentially declared major disasters covered under the Stafford Act. The City recognizes that the City's annual entitlement is not sufficient to meet all of the needs of the community. It is therefore important to leverage resources to achieve the goals of the City. The City works diligently with private, state and local partners to leverage the City's HUD CPD funds. Matching requirements will be satisfied with other eligible financial resources and/or in-kind services, and the City will continue to seek this type of matching as well as financial matches.

Given the limited size of the CDBG and HOME annual allocations the City may consider pursuing new Section 108 loans within the five-year Consolidated Plan period to support large-scale public improvements or housing projects.

Depending on the financing structure of a given activity, it may be advantageous for the City to use CDBG funds to leverage appropriate state, local, and private resources, including but not limited to those listed below.

Federal Resources

- Continuum of Care (CoC) Program
- HUD Veterans Affairs Supportive Housing (HUD-VASH)
- Supportive Housing for the Elderly (Section 202)
- Supportive Housing for Persons with Disabilities (Section 811)
- Housing Opportunities for Persons with AIDS (HOPWA)
- YouthBuild
- Federal Low-Income Housing Tax Credit Program
- Project Based Housing Choice Vouchers

State Resources

- Low-Income Housing Tax Credit Program
- Tax-Exempt Bond Financing
- Permanent Local Housing Allocation
- Building Equity and Growth in Neighborhoods Program (BEGIN)
- CalHome Program
- Multifamily Housing Program (MHP)
- Homekey
- CalHFA Single and Multi-Family Program

- Mental Health Service Act (MHSA) Funding
- Affordable Housing and Sustainable Communities Program

Local Resources

- San Diego County CoC
- San Diego Housing Commission (SDHC)
- California Home Finance Agency
- City of Oceanside In Lieu Fees
- Low and Moderate Income Housing Asset Fund (Successor Housing Agency)

Private Resources

- Federal Home Loan Bank, Affordable Housing Program
- Community Reinvestment Act Programs
- United Way
- Private Contributions

If appropriate, describe publicly owned land or property located within the jurisdiction that may be used to address the needs identified in the plan

Oceanside will comply with new State requirements under AB1486 and AB1255 to inventory and support developers access and utilize surplus municipal and state land for the construction of affordable housing. If such sites are identified, the City will consider the use of HUD or other resources to assist with site preparation. At the point of developing this Consolidated Plan and Action Plan, the City does not have any publicly owned land that can be used to support the development of affordable housing within the City of Oceanside. As part of 2021-2029 Housing Element 's Housing Element update, the Planning Department analyzed potential housing sites, including any city-owned land, that have opportunities for affordable housing.

Land Inventory Summary

	Income Category				Total
	Very Low	Low	Moderate	Above Moderate	
RNHA	1,268	718	883	2,574	5,443

Total Underutilized Sites	3,192		633		3,825
% of Total Sites Inventory	77.8%		30.0%		61.5%
% Remaining RHNA Units	177.6%		96.0%		155.7%
Shortfall/Surplus	2,306		1,453		3,759
Adequate Sites?	Yes		Yes		

Source: City of Oceanside, 2022

Discussion

The analysis demonstrates that the City's total land inventory does not have adequate sites without rezoning to accommodate the RHNA allocation. As discussed in the analysis of non-governmental constraints, these sites were selected along commercial corridors and infill sites where there are no infrastructure deficiencies that would preclude development commensurate with the level of need identified in the RHNA. The City is the water and sewer service provider for most of the City, including all the areas where sites are located. The City expects there is enough capacity for water and sewer for RHNA units. Also, based on the location of sites along corridors and downtown areas, these sites have access to dry utilities (Wi-Fi and broadband). As part of the ongoing General Plan update, the City expects to incorporate a Smart City concept to expand Wi-Fi/internet access. In addition, this Housing Element includes a program for the City to adopt a policy to prioritize water and sewer services for affordable housing projects.

SP-40 Institutional Delivery Structure – 91.215(k)

Explain the institutional structure through which the jurisdiction will carry out its consolidated plan including private industry, non-profit organizations, and public institutions.

Responsible Entity	Responsible Entity Type	Role	Geographic Area Served
City of Oceanside	Government	Economic Development Homelessness Non-homeless special needs Ownership Planning Rental Neighborhood improvements Public facilities Public services	Jurisdiction
San Diego County CoC	Continuum of care	Homelessness	Region
Oceanside Housing Authority	Government	Public Housing	Jurisdiction
Interfaith Community Services CSA San Diego Legal Aid Society of San Diego	Non-profit organizations	Non-homeless special needs Planning public services	Region
2-1-1 Lifeline Community Services Vista Community Clinic	Other	Homelessness Non-homeless special needs Public Housing public services	Region

Table 32 - Institutional Delivery Structure
Assess of Strengths and Gaps in the Institutional Delivery System

To effectively design and implement the City’s CDBG and HOME programs, the City is dependent upon a network of city agencies and partner agencies and nonprofits to ensure programs are effectively and efficiently carried out. Housing, supportive services, and community development activities for residents in Oceanside are delivered by a large number of public agencies, nonprofit organizations, and private entities. Participants in the stakeholder round table, community meetings, and survey

respondents indicated that coordination is an issue. Many residents are not aware of the services being offered. Some service providers are not aware of the work in which their counterparts in the community are engaged.

The greatest strength of the institutional delivery system is a high level of communication and collaboration among the key institutions as well as the public service providers and housing developers who implement the programs. City staff responsible for managing CDBG and HOME regularly communicates and gathers feedback from these other stakeholders to better understand community needs and design programs that are responsive to them.

The City regularly communicates with the San Diego County CoC to understand the needs of the homeless population and those at-risk of becoming homeless in the City. The City maintains an active database of services for homeless and special needs services and facilities throughout the County and assists residents identify and access these resources.

The greatest challenge in the institutional structure is a lack of funding to meet the demand for housing, public facilities, and public services. Consequently, partner agencies are forced to compete for funding and there is not adequate funding from HUD and other state/ local sources to address the breadth and depth of needs in the community. Further, time capacity of City staff and partner agencies is limited – reducing the availability and space for coordination and collaboration among different stakeholders and organizations.

Table 33 - Homeless Prevention Services Summary

Describe how the service delivery system including, but not limited to, the services listed above meet the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth)

There are multiple pathways to access the services available in Oceanside to individuals and households experiencing or at risk of experiencing homelessness. The CoC and the recipients of homeless funding from the U.S. Department of Housing and Urban Development (HUD) and Homeless Housing, Assistance and Prevention (HHAP) Grant funds from the State of California utilize 2-1-1 San Diego and the Coordinated Entry System (CES) system to match clients to appropriate services. The City also provides a resource guide to people who are accessing services that is available at the lobby and on the City's website. A primary objective of homeless service providers working with the City and the CoC is to connect program participants with eligible mainstream resources. Many regional county resource centers that provide services including behavioral and mental health services are based out of Oceanside.

Services and facilities listed under SP-40 Institutional Delivery Structure and MA-35 Special Needs Facilities and Services include:

- **Emergency Shelters and Transitional Housing:** Provide immediate relief with supportive services to help individuals transition to permanent housing.
- **Permanent Supportive Housing (PSH):** Addresses the needs of the most vulnerable populations, particularly those with chronic conditions or disabilities.
- **Outreach and Navigation Services:** Engage unsheltered populations, offering coordinated entry into housing systems.
- **Behavioral Health and Substance Use Treatment:** Integrated into supportive housing programs, addressing co-occurring disorders prevalent among the homeless population.
- **Employment and Training Services:** Help individuals gain financial stability, reducing the risk of recurring homelessness.

These facilities and services are strategically designed to meet the needs of vulnerable populations in Oceanside and are integral to the city's comprehensive approach to addressing homelessness.

Describe the strengths and gaps of the service delivery system for special needs population and persons experiencing homelessness, including, but not limited to, the services listed above

In Oceanside there are a variety of services available to those with special needs and those experiencing or at risk of experiencing homelessness, provided by a mix of public, private, and charitable organizations. However, the gaps in the service delivery system are:

- Inadequate funding to provide the level of services needed for long term assistance for clients on fixed or limited income (e.g. Housing Choice Vouchers), and
- While there is ongoing coordination across different agencies regional stakeholders have expressed that there is room for improvement.

The City is not a direct recipient of Emergency Solutions Grant (ESG) funds; therefore, most of the HUD funding to address homelessness is available through the San Diego County Continuum of Care which oversees the funding application cycle for HUD's CoC funding and HHAP funding from the State of California. A review of the funding requests versus the awards demonstrates there is a gap in funding addressing the needs of the region to serve homeless populations and those with special needs. However, the Neighborhood Services Department coordinates regularly with the CoC and other service providers and large stakeholders in the region. The Department maintains a web-based database of available services for special needs populations (<https://www.ci.oceanside.ca.us/government/housing-neighborhood-services/homeless-services/homeless-services>) and refers residents to 2-1-1. Oceanside regularly communicates with these stakeholders to provide feedback and input on needs that are identified in Oceanside.

Provide a summary of the strategy for overcoming gaps in the institutional structure and service delivery system for carrying out a strategy to address priority needs

To address the lack of resources necessary to fully address the needs of special needs populations and persons experiencing homelessness the City will continue allocating the maximum allowable amount of CDBG funds to public services. The City will work to leverage its HOME funds, including CHDO Set-Aside and Low Moderate Income Housing Asset (LMIHAF) funds with other state, federal and local resources to address its priority needs.

SP-45 Goals Summary – 91.215(a)(4)

Goals Summary Information

Sort Order	Goal Name	Start Year	End Year	Category	Geographic Area	Needs Addressed	Funding	Goal Outcome Indicator
1	Affordable Housing Development and Preservation	2025	2029	Affordable Housing	Citywide	Conserve and Improve Existing Affordable Housing; Provide Homeownership & Rehabilitation and TBRA Assistance Assist in the Development of Affordable Housing	HOME-ARP: \$3,500,000 CDBG: \$1,100,000 HOME: \$3,294,181	Rental units constructed: HOME ARP - 100 Tenant-based rental assistance / Rapid Rehousing - 150 Households Assisted Homeowner Housing – 15 Units Rehabilitated – 10 MHIP – 75 Units
Description: This goal is achieved through a variety of programs and activities, including, but not limited to: <ul style="list-style-type: none"> Acquisition, rehabilitation, and/or development of multi-family affordable housing projects; Down-payment assistance (dependent upon market conditions); Rehabilitation assistance to property owners to improve single-family, and mobile homes; Tenant-based rental assistance; and Lead-based paint hazard reduction efforts. 								
2	Fair Housing Services	2025	2029	Affordable Housing Homeless	Citywide	Ensure Equal Access to Housing Opportunities	CDBG: \$125,000	Other: 375 Other

Table 34 – Goals Summary

Goal Descriptions

1	Goal Name	Affordable Housing Development and Preservation
	Goal Description	Expand, improve, and preserve the housing stock of low- and moderate-income owners and renters in the City of Oceanside by supporting the acquisition, development, and rehabilitation of owner and renter properties in the City.
2	Goal Name	Fair Housing Services
	Goal Description	Provide guidance and assistance to residents to increase their awareness of fair housing rights and support residents report fair housing issues and seek corrective action.
3	Goal Name	Public Services
	Goal Description	Provide funding to community-based organizations who offer critical services such as youth/senior programming, transportation, childcare, employment referrals, fair housing/tenant-landlord and other needs as determined via a competitive application annually.
4	Goal Name	Homeless Services and Community Facilities
	Goal Description	The City anticipates launching this goal in 2021. Support the provision of homeless services and/ or facilities to better serve homeless and those at-risk of becoming homeless.

5	Goal Name	Public Facilities and Infrastructure
	Goal Description	In collaboration with public works, Development Services and Property Management rehabilitate public facilities, streets and sidewalks, lighting and traffic control to improve ADA accessibility, use, and revamp and improve facilities to better meet the needs of residents.
6	Goal Name	Administration & Section 108 Repayment
	Goal Description	Ensure the management of a compliant and efficient CDBG program and complete necessary Section 108 Loan Repayments.

Estimate the number of extremely low-income, low-income, and moderate-income families to whom the jurisdiction will provide affordable housing as defined by HOME 91.315(b)(2)

DRAFT

Over the Consolidated Plan cycle it is estimated that 265 people will be assisted through the use of HOME and HOME-ARP funds in the provision of affordable housing development, tenant-based rental assistance and homebuyer assistance programs.

DRAFT

SP-50 Public Housing Accessibility and Involvement – 91.215(c)

Need to Increase the Number of Accessible Units (if Required by a Section 504 Voluntary Compliance Agreement)

N/A

Activities to Increase Resident Involvements

The Oceanside Housing Authority has the Family Self Sufficiency Program (FSS) open to up to 50 Section 8 Head of Household recipients. FSS staff provides financial education and counseling, and benefit eligibility to include CalFresh and MediCal. Benefits include the establishment of a special, interest-bearing escrow account that helps participants to meet expenses related to achieving career goals. Participants may receive additional credits to their account as they achieve their goals.

Is the public housing agency designated as troubled under 24 CFR part 902?

SP-55 Barriers to affordable housing – 91.215(h)

Barriers to Affordable Housing

A barrier to affordable housing is a public policy or nongovernmental condition that constrains the development or rehabilitation of affordable housing, such as land use controls, property taxes, state prevailing wage requirements, environmental protection, cost of land and availability of monetary resources. Barriers to affordable housing are distinguished from impediments to fair housing choice.

The most noteworthy environmental constraints in Oceanside are the San Luis Rey River Floodplain and the agricultural lands in the northeastern portion of the city. These areas are largely protected from incompatible development by open space and agricultural zoning. In collaboration with the City, the U.S. Army Corps of Engineers has implemented an extensive levee system along the San Luis Rey River that has allowed for new housing development and reduced the risk of flooding for hundreds of existing dwelling units.

The Corps, in coordination with the City's Public Works Department, conducts routine brush clearing activities within the San Luis Rey riverbed. The Public Works Department is also responsible for the maintenance and repair of drainage facilities within the City right-of-way which includes the annual inspection and cleaning of over 3,500 City storm drains and catch basins. Other responsibilities include debris removal and clearing drainage systems during and after storm events, vegetation management and removal, silt removal, detention basin maintenance and erosion control of slopes along open channels and other drainage facilities. Development in steep hillside areas is also regulated by the City's Hillside Development regulations, which require a Hillside Development Plan to minimize grading and preserve the natural appearance of the hillsides. Density reductions and identification of steep slopes unsuitable for development may result.

Based on information gathered during community meetings, the 2020-2024 Analysis of Impediments to Fair Housing Choice (AI), Community Listening Sessions, Consolidated Plan Resident Survey, the 2021-2029 Housing Element, and market analysis, the primary barriers to affordable housing in Oceanside are the following:

- difficulty navigating the process to access affordable housing;
- shortage of affordable housing units and a long Housing Choice Voucher (Section 8) waiting list;
- concentrations of racial and ethnic minorities; and
- barriers are often layered.

These barriers are interconnected as the demand for affordable housing exceeds the supply. There are insufficient resources to increase the supply of affordable housing resulting in renter households carrying a housing cost burden in excess of 30 percent of AMI and/ or living in areas with low access to opportunities and high exposure to adverse community factors.

The elimination of local Redevelopment Agencies by the State of California in 2011 resulted in the loss of a crucial resource for the development and preservation of affordable housing.

Other factors:

State Prevailing Wage Requirements - Labor Code Section 1720 applies prevailing wage rates to public works over \$1,000. Public works are defined as construction, alteration, installation, demolition, or

repair work done under contract and paid for in whole or in part out of public funds. This adds to the overall cost of development.

Environmental Protection - State and federal law requires and regulates the environmental review of proposed discretionary projects. Costs associated with these environmental review processes add to the overall cost of development.

Davis-Bacon Prevailing Wages - A prevailing wage must be paid to laborers when federal funds are used to pay labor costs for any project over \$2,000 or on any multi-family rehabilitation project over eight units. The prevailing wage is usually higher than competitive wages, raising the cost of housing production and rehabilitation activities. Davis-Bacon also carries the burden of documentation of compliance. These requirements may serve as a barrier to the participation of small and minority owned contracting businesses.

Public Opposition to Affordable Housing - Public opposition can cause delays in the review process which adds to the cost of development and sometimes may lead to project denial. Due to changes in state law, the ability to deny a project without sufficient findings could result in delays due to potential litigation.

Within the City of Oceanside, the city strives to limit public policies that may adversely impact the construction or preservation of affordable housing and residential investment. The City collaborates with other jurisdictions throughout San Diego County to produce a regional Analysis of Impediments to Fair Housing Choice.

Strategy to Remove or Ameliorate the Barriers to Affordable Housing

To address housing affordability and the scarcity of monetary resources for affordable housing, this Strategic Plan calls for the investment of CDBG and HOME funds for the development of new and preservation of existing affordable rental housing units over the next five years.

Although the City's Housing Authority has limited former Redevelopment Housing Set-Aside funds (LMIHAF), it will continue to leverage CDBG and HOME funds to attract private and other available public resources.

SP-60 Homelessness Strategy – 91.215(d)

Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs

City of Oceanside-Specific Programs and Facilities for Homeless Populations

The City of Oceanside provides a comprehensive range of services and facilities to address the diverse needs of homeless individuals and families. These programs focus on vulnerable populations, including chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth. The services and facilities outlined below are part of a coordinated approach with regional partners, many of which are detailed in SP-40 Institutional Delivery Structure and MA-35 Special Needs Facilities and Services.

Addressing the emergency and transitional housing needs of homeless persons

1. Services and Facilities for Chronically Homeless Individuals and Families

- Chronically homeless individuals and families often require long-term housing solutions with integrated supportive services. Oceanside's programs include:
- Permanent Supportive Housing (PSH): Offers stable housing with wraparound services, including mental health care, substance use counseling, and life skills training. These facilities provide long-term solutions for individuals with disabling conditions.
- Emergency Shelter Programs: Provide immediate relief and a pathway to permanent housing. Shelters include access to hygiene services, case management, and health referrals.
- Street Outreach Services: Dedicated teams engage unsheltered individuals to connect them with housing resources and healthcare services. Outreach focuses on those living in encampments, vehicles, or other non-traditional shelters.

These services directly address chronic homelessness by providing stability and long-term solutions that go beyond emergency interventions.

Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again.

Services and Facilities for Veterans and Their Families

Veterans experiencing homelessness face distinct challenges, including service-related disabilities and difficulties reintegrating into civilian life. Oceanside provides specialized services for this population:

- **Veteran-Specific Housing:** Permanent supportive housing units are designated for veterans, with case management services that address physical health, mental health, and employment barriers.
- **Veteran Outreach and Navigation:** Specialized outreach teams connect veterans to housing resources, VA benefits, and supportive services.
- **Employment Support for Veterans:** Workforce development programs assist veterans in gaining employment, with services tailored to address unique barriers faced by former service members.
- **Mental Health Services for Veterans:** Access to counseling and peer support groups helps veterans address service-related trauma and other mental health concerns.

Veteran-specific services ensure that those who have served receive comprehensive support tailored to their unique needs.

Help low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families who are likely to become homeless after being discharged from a publicly funded institution or system of care, or who are receiving assistance from public and private agencies that address housing, health, social services, employment, education or youth needs

Services and Facilities for Families with Children

Families experiencing homelessness in Oceanside have access to targeted services designed to maintain family unity, ensure children's education, and promote long-term housing stability:

- **Family Emergency Shelters:** Provide safe and private accommodation for parents and children. Services include case management, employment assistance, and connections to educational resources for children.
- **Transitional Housing:** Temporary housing options help families stabilize while seeking permanent solutions. Families receive support for job training, financial literacy, and childcare.
- **Rapid Rehousing Programs:** Offer rental assistance and supportive services to quickly transition families into stable housing and prevent long-term shelter stays.
- **Food and Material Assistance:** Programs provide food distribution, clothing vouchers, and hygiene supplies to support families in crisis.

These services focus on preventing the cycle of homelessness among children and ensuring family well-being.

SP-65 Lead based paint Hazards – 91.215(i)

Actions to address LBP hazards and increase access to housing without LBP hazards

The City of Oceanside has 29,334 housing units built prior to 1978 when lead was eliminated from paint used in housing; this is approximately 45 percent of the units in the City. While most of these units could contain lead-based paint hazards, the vast majority of the single-family units are occupied by moderate- income and higher income individuals and families. Units most likely to house extremely low-, very low- and low-income families are rental units in apartments or other multi- family dwellings. The City inspects units for lead-based paint hazards as part of approving rehabilitation loans, but only occasionally finds a unit requiring mitigation.

The City does not consider lead-based paint to be an acute danger for residents in CDBG neighborhoods. At the same time, the City maintains an active outreach program to inform residents of such hazards, and an inspection program to identify lead-based paint hazards as part of building and code inspection efforts, inspections related to City- funded rehabilitation loans, and visual inspection of properties under consideration by first-time homebuyers. All persons receiving CDBG, HOME or local funds for acquisition or rehabilitation of housing built before 1978, including rehabilitation of rental units, receive information on lead-based paint hazards, whether or not a hazard has been detected.

How are the actions listed above related to the extent of lead poisoning and hazards?

The City places a high priority on addressing lead-based paint hazards. Code Enforcement officers will look for lead-based paint hazards as part of ongoing code enforcement and inspection activities. Building Department inspectors will be alert to rental units of such age that the units may contain lead-based paint and will inform tenants and property owners as part of their inspections of the dangers of lead-based paint. The City will distribute the brochures, "Lead Based Paint, a Threat" and "Protect Your Family from Lead in Your Home." The City will share and compare data on children with elevated blood levels with San Diego County Health and Human Services Agency, Vista Community Clinic, North County Health Services and Tri-City Hospital. The Housing Quality Standards (HQS) inspector, the Rehabilitation Specialist, and Section 8 Housing Specialists attend training on lead-based paint hazards. When Section 8 inspectors do initial or recertification inspections on units, they check first to determine the year the unit was constructed. If built prior to 1978 and the household has children under six years of age, the inspector must confirm that there are no loose paint chips or peeling paint anywhere in the unit. If the inspector does find peeling paint or chips, the unit must be inspected for lead-based paint before it can be approved for use by a household with a Section 8 Housing Choice Voucher.

How are the actions listed above integrated into housing policies and procedures?

CDBG and HOME programs require compliance with all of HUD's regulations concerning lead-based paint. All housing programs operated by the City are in compliance with HUD's most recent standards regarding lead-based paint. The City's homeowner rehabilitation loan program meets the federal requirements for providing lead-based paint information with each rehabilitation loan and requiring paint testing of disturbed surfaces for lead in all single-family homes constructed before 1978. If a home was found to have lead-based paint, the cost of lead-based paint removal is an eligible activity under the homeowner rehabilitation program. The County of San Diego maintains a separate lead program and includes provisions in housing assistance programs they provide. City building inspectors are alert to any housing units that apply for a permit for construction or remodeling, which may contain lead-based paint and other lead hazards. The County of San Diego's Childhood Lead Poisoning Prevention Program (CLPPP), a division of the San Diego Health and Human Services Agency provides outreach and education programs and case management services for San Diego County residents, including Oceanside residents.

The following rule took effect in April 2010:

Contractors performing renovation, repair and painting projects that disturb lead-based paint in homes, childcare facilities, and schools built before 1978 must be certified and must follow specific work practices to prevent lead contamination. HUD's Lead Safe Housing Rule (LSHR) requires clearance examinations. All housing receiving federal assistance must comply with the LSHR.

Child-occupied facilities are defined as residential, public or commercial buildings where children under age six are present on a regular basis. The requirements apply to renovation, repair or painting activities. The rule does not apply to minor maintenance or repair activities where less than six square feet of lead-based paint is disturbed in a room or where less than 20 square feet of lead-based paint is disturbed on the exterior. Window replacement is not minor maintenance or repair.

Contractors performing renovation, repair and painting projects that disturb lead-based paint shall provide to owners and occupants of child care facilities and to parents and guardians of children under age six that attend child care facilities built prior to 1978 the lead hazard information pamphlet Renovate Right: Important Lead Hazard Information for Families, Child Care Providers, and Schools.

In order to address the health risks to young children posed by lead-based paint in residential dwellings, the City will implement the following guidelines as recommended by HUD for housing and community development programs and for rehabilitation of residential properties.

The term “rehabilitation” is used by HUD and the City to describe all residential renovation work.

Lead-based paint hazard regulations and inspection practices do not apply to senior- only housing units regardless of the age of the property. Certain lead-based paint hazard requirements apply to units occupied by Section 8 and TBRA households that have one or more children under age six, the common areas servicing the units, and other areas used by unit residents and frequented by children under age six. The HQS inspector must evaluate the unit and common areas for any real or potential hazard through a visual assessment by the inspector and paint testing on deteriorated services if constructed prior to 1978. If lead-based paint hazards are shown to exist or likely to exist, the property owner must mitigate the hazard before the unit can be approved for occupancy by a Section 8 or TBRA household. Units will be reviewed for compliance during annual recertification by the HQS inspector.

DRAFT

SP-70 Anti-Poverty Strategy – 91.215(j)

Jurisdiction Goals, Programs and Policies for reducing the number of Poverty-Level Families

As part of the City of Oceanside's Consolidated Plan, it prioritizes developing and expanding access to affordable housing as well providing public services targeted to households living at or below the poverty level within the City. Additionally, the City established a Comprehensive Homeless Strategic Plan in 2019 to ensure targeted resources to address the needs of extremely low-income and homeless households living in Oceanside.

How are the Jurisdiction poverty reducing goals, programs, and policies coordinated with this affordable housing plan

The City's antipoverty strategy of providing safe, affordable housing and critical public services will assist in reducing the number of poverty level families in Oceanside. By providing safe, affordable housing for those on a limited income, those families will be able to live in an environment where no more than 30% of their limited income is spent on housing. In addition, the City provides programs (e.g. after school, computer labs, budgeting and language classes) to assist residents in excelling in both school and the work environment.

SP-80 Monitoring – 91.230

Describe the standards and procedures that the jurisdiction will use to monitor activities carried out in furtherance of the plan and will use to ensure long-term compliance with requirements of the programs involved, including minority business outreach and the comprehensive planning requirements

Monitoring of subrecipients emphasize program, financial, and regulatory performance of CDBG subrecipients, and subrecipients of capital improvement project funds in the past five years. Primary objectives are:

1. To make sure subrecipients comply with all regulations governing administrative, financial, and programmatic operations, including Davis-Bacon prevailing wage requirements when applicable;
2. To make sure subrecipients achieve their performance objectives within the approved schedule and budget; and
3. To provide technical assistance to subrecipients as needed or requested.

The City provides subrecipients with copies of HUD documents and circulars from the Office of Management and Budget (OMB) that provide guidance. All subrecipients receive the latest edition of *Playing by the Rules: A Handbook for CDBG Subrecipients*. The City provides copies to new subrecipients at the beginning of the program year together with instruction on reporting requirements and obligations under the agency's contract with the City. All subrecipients are informed about HUD performance measurement requirements and outcome statements. Staff provide additional information to subrecipients that receive CDBG funds for capital projects as to the length of time that that funded project must meet National Objective and eligible activity requirements.

Specific steps in monitoring include the following:

- Review all proposed projects during the pre-award assessment to evaluate nature of activity, organization's capacity to do the work, and potential conflicts of interest
- Prepare an environmental review document as part of contract preparation for each activity funded
- Conduct joint orientation training at the beginning of the program year for new subrecipients and new subrecipient staff managing CDBG grants.
- Subrecipients are required to provide reports quarterly that City staff evaluate for compliance
- Subrecipients that receive CDBG funds for capital improvement projects or for acquisition of facilities file reports every three months during the project period,
- The City requests an annual report from agencies that received CDBG funding for capital improvement
- CDBG staff provide technical assistance as requested CDBG staff establish an annual monitoring plan including these components:
 - Identification of subrecipients most likely to have serious problems

- Development of a schedule for on-site visits, with joint visits by CDBG staff from other cities
 - Annual on-site monitoring of all subrecipients, usually during April and May of the program year
 - Notification of the subrecipient with any findings from the monitoring visit
- City CDBG staff will request and maintain file copies of annual financial audits of subrecipient agencies
- The City maintains a permanent file on all present and past subrecipients
- City CDBG staff inspect facilities used to provide CDBG-funded programs to ensure that the facilities meet accessibility requirements for persons with disabilities
- The City will work with CDBG and HOME subrecipients when facilities are not in full compliance with Section 504 requirements to correct deficiencies.
- HOME Program conduct monitoring and inspection of rental projects developed with HOME
- The City annually monitors borrowers using the City's first-time homebuyer loan program
- City staff inspect rehabilitation/renovation construction activity including CDBG- funded rehabilitation projects for owner-occupied single-family residences (loans) or mobile homes (grants), HOME-funded rehabilitation projects for transitional housing or permanent supportive housing, and rental rehabilitation projects

Expected Resources

Note: Share of program income can be allocated to Administration activities

Table 35 - Expected Resources – Priority Table

Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied

The City recognizes that the City's annual entitlement is not sufficient to meet all of the needs of the community. It is therefore important to leverage resources to achieve the goals of the City. The City works diligently with private, state and local partners to leverage the City's HUD CPD funds. Matching requirements will be satisfied with other eligible financial resources and/or in-kind services, and the City will continue to seek this type of matching as well as financial matches.

DRAFT

If appropriate, describe publicly owned land or property located within the jurisdiction that may be used to address the needs identified in the plan

Oceanside will comply with new State requirements under AB1486 and AB1255 to inventory and support developers access and utilize surplus municipal and state land for the construction of affordable housing. If such sites are identified, the City will consider the use of HUD or other resources to assist with site preparation. At the point of developing this Consolidated Plan and Action Plan, the City does not have any publicly owned land that can be used to support the development of affordable housing within the City of Oceanside. As part of 2021 – 2029 Housing Element, the Planning Department analyzed any potential housing sites, including any city-owned land, that have opportunities for affordable housing. The City of Oceanside has not identified specific city-owned sites at this time.

Discussion

DRAFT

With no adjacent unincorporated land available for annexation, and with regional planning policies discouraging sprawl and encouraging more efficient use of already-developed areas, the City expects to augment its housing stock primarily through infill and redevelopment both within and adjacent to the commercial corridors of Downtown, Coast Highway, Mission Avenue, Oceanside Boulevard, and Vista Way, where zoning allows for high-density housing in conjunction with mixed-use development.

These corridors are four to six miles in length, extending from the City's coastal zone to its inland boundaries. These corridors bear commercial land use and zoning designations that allow for housing in conjunction with mixed-use development. As the City of Oceanside has little remaining greenfield available for development, there is a need to identify property within these urbanized corridors that can accommodate growth through infill and redevelopment. These corridors are four to six miles in length, extending from the City's coastal zone to its inland boundaries. These corridors bear commercial land use and zoning designations that allow for housing in conjunction with mixed-use development. While it is presently assumed that these corridors have the potential to accommodate as much as 4,000 new housing units, the City has concluded that infrastructure improvements and zoning incentives are necessary to spur housing growth in these areas.

To this end, the City recently initiated a comprehensive update to its General Plan. Integrated in this effort is a Smart and Sustainable Corridors Specific Plan (SSCSP), funded through a Caltrans' Sustainable Transportation Grant Program. While the SSCSP was originally conceived as a policy document outlining the overall vision for the corridors, it is now the City's intent to prepare a regulatory document that will establish new zoning standards that facilitate infill and redevelopment.

The SSCSP will play a key role in establishing a growth vision for the next 15 to 20 years by:

- 1) Identifying those areas best suited for future employment and housing growth; and
- 2) Ensuring that the resources necessary to accommodate such growth are dedicated to these areas.

The SSCSP will promulgate smart growth policies that fulfill a key mandate of the City's recently-adopted Climate Action Plan – i.e., enabling transit-oriented development as the principal means of accommodating future housing and employment growth. While current zoning within the City's major commercial corridors allows for mixed-use development with residential densities up to 29 dwelling units per acre, it is clear that new policies, standards, and incentives are needed to spur infill and redevelopment in these areas. The SSCSP and related planning efforts will identify ways to promote efficient and synergistic land use in these areas, while at the same time protecting the integrity of adjacent single-family neighborhoods.

Projects

AP-35 Projects – 91.220(d)

Introduction

During the 2025 program year, the City of Oceanside will fund the following projects.

Projects

#	Project Name
1	Program Administration
2	Housing Rehabilitation
3	Affordable HOME Housing
4	Public Facilities and Infrastructure
5	Special Need Services and Facilities
6	Public Services
7	Fair Housing
8	Section 108 Loan Repayment

Table 37 – Project Information

Describe the reasons for allocation priorities and any obstacles to addressing underserved needs

Oceanside uses a place-based strategy during the planning period. The geographic distribution of funding is predicated somewhat on the nature of the activity to be funded. It is the City's intent to fund activities in the areas most directly affected by the needs of low-income residents and those with other special needs.

AP-38 Project Summary

Project Summary Information

1	Project Name	Program Administration
	Target Area	Citywide
	Goals Supported	Affordable Housing Development and Preservation Fair Housing Services Public Services Public Facilities and Infrastructure Special Need Services and Administration Administration & Section 108 Repayment
	Needs Addressed	Expand Affordable Housing Maintain Existing Housing Stock Homeless Services and Facilities Barriers to Accessible Facilities Update and Expand Public Facilities Support Community Needs and Programming Ensure Equal Access to Housing Opportunities
	Funding	CDBG: \$206,053 HOME: \$60,185
	Description	Overall administration of the CDBG and HOME Program including: completion of grant application, oversight of citizen participation process, development of annual funding contracts with agencies, set up of projects in HUD funds disbursement system and draw down funds, implementation of projects and compliance with HUD reporting requirements. Funding for this activity includes HOME and CDBG administrative set aside associated with prior year unprogrammed resources and the HOME waiver authorizing an increase in the share of program administration for the current year allocation.
	Target Date	6/30/2026
	Estimate the number and type of families that will benefit from the proposed activities	n/a

5	Planned Activities	Oceanside Resource Center (1210 Division Street) – Complete ADA compliance Country Club Senior Center -Flooring Non-Profit ADA Parking Lot Improvements
	Project Name	Special Need Services and Facilities
	Target Area	Citywide

	Goals Supported	Homeless Services and Facilities Barriers to Accessible Facilities Update and Expand Public Facilities
	Needs Addressed	Barriers to Accessible Facilities Update and Expand Public Facilities
	Funding	CDBG: \$0
	Description	Provide funding to support Special Need Services and Facilities.
	Target Date	6/30/2026
	Estimate the number and type of families that will benefit from the proposed activities	50 household units
	Location Description	Eligible Census Tracts or qualified low- and moderate-income clientele
	Planned Activities	Provide funding to city staff to conduct code enforcement activities in CDBG eligible geographies.
6	Project Name	Public Services
	Target Area	Citywide
	Goals Supported	Public Services
	Needs Addressed	Support Community Needs and Programming
	Funding	CDBG: \$154,451
	Description	Provide social and community services to low- and moderate-income residents throughout the City of Oceanside, especially services targeted to key populations including youth, elderly, homeless, affair housing nd other special needs populations. This activity includes the public service allocation from prior year program income.
	Target Date	6/30/2026

	Estimate the number and type of families that will benefit from the proposed activities	1,500 persons assisted
	Location Description	Citywide
	Planned Activities	In collaboration with nonprofit partners, provide social and community services to low- and moderate-income residents throughout the City of City of Oceanside, especially targeting services to youth, elderly, homeless, and other special needs populations.
7	Project Name	Fair Housing
	Target Area	Citywide
	Goals Supported	Fair Housing Services
	Needs Addressed	Ensure Equal Access to Housing Opportunities
	Funding	CDBG: \$25,000
	Description	Provide funding for fair housing programming, outreach, education, and other support services to residents of Oceanside.
	Target Date	6/30/2026
	Estimate the number and type of families that will benefit from the proposed activities	75 low- and moderate-income persons
	Location Description	Citywide
	Planned Activities	Provide funding for fair housing programming, outreach, education, and other support services to residents of Oceanside.
8	Project Name	Section 108 Loan Repayment
	Target Area	Citywide
	Goals Supported	Administration & Section 108 Repayment
	Needs Addressed	Update and Expand Public Facilities
	Funding	CDBG: \$263,300

	Description	Repay existing Section 108 loan.
	Target Date	6/30/2026
	Estimate the number and type of families that will benefit from the proposed activities	N/A
	Location Description	N/A
	Planned Activities	Repay existing Section 108 loan.

DRAFT

AP-50 Geographic Distribution – 91.220(f)

Description of the geographic areas of the entitlement (including areas of low-income and minority concentration) where assistance will be directed

HUD resources will be prioritized throughout the City with the primary objective of meeting the needs of low- and moderate-income residents in the City. When evaluating potential projects and programs, the City will ensure that projects are structured to prioritize areas where there is a higher concentration of low- and moderate-income residents. The map below indicates Census block groups in which at least 51% of the residents are low- or moderate-income residents. The City will prioritize funding in these block groups.

A detailed description of minority and low-income concentration is provided in the Consolidated Plan in the MA-50 section.

Geographic Distribution

Target Area	Percentage of Funds
Citywide	100%

Table 38 - Geographic Distribution

Rationale for the priorities for allocating investments geographically

The City of Oceanside does not use specific target areas to guide the allocation of funding. The City prioritizes funding that meets community needs and complies with HUD regulations/requirements.

Discussion

See summary of geographic priorities above.

Affordable Housing

AP-55 Affordable Housing – 91.220(g)

Introduction

Through the projects and goals of the 2025-2026 Action Plan, the City estimates it will assist in the construction or rehabilitation of 18 units.

Discussion

See summary of affordable housing goals above.

AP-60 Public Housing – 91.220(h)

Introduction

The City of Oceanside is predominately served by the Oceanside Housing Authority. The OHA does not own or operate public housing, providing only Housing Choice Vouchers, i.e., Section 8 rental assistance.

Actions planned during the next year to address the needs to public housing

Not applicable, the City of Oceanside does not maintain any public housing.

Actions to encourage public housing residents to become more involved in management and participate in homeownership

The Oceanside Housing Authority operates a self-sufficiency program to support active HCV households in becoming more self-sufficient. Additionally, the housing authority operates a homeownership voucher program in which current HCV households can apply for and use their existing voucher to assist in purchasing a home.

If the PHA is designated as troubled, describe the manner in which financial assistance will be provided or other assistance

N/A. The PHA is not designated as “Troubled”.

Discussion

AP-65 Homeless and Other Special Needs Activities – 91.220(i)

Introduction

Describe the jurisdictions one-year goals and actions for reducing and ending homelessness including

Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs

Addressing the emergency shelter and transitional housing needs of homeless persons

Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again

Helping low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families and those who are: being discharged from publicly funded institutions and systems of care (such as health care facilities, mental health facilities, foster care and other youth facilities, and corrections programs and institutions); or, receiving assistance from public or private agencies that address housing, health, social services, employment, education, or youth needs

Discussion

AP-75 Barriers to affordable housing – 91.220(j)

Introduction:

The City regulates the use of land within the City limits through the General Plan, the Zoning Ordinance, and Building Codes. The General Plan guides all future development by providing overall densities and development policies for all areas of the community. Zoning has been used as a site-specific tool to derive the density and intensity of proposed land uses.

Within the City of Oceanside, the city strives to limit public policies that may adversely impact the construction or preservation of affordable housing and residential investment. The City collaborates with other jurisdictions throughout San Diego County to produce a Regional Analysis of Impediments to Fair Housing Choice.

Actions it planned to remove or ameliorate the negative effects of public policies that serve as barriers to affordable housing such as land use controls, tax policies affecting land, zoning ordinances, building codes, fees and charges, growth limitations, and policies affecting the return on residential investment

Once drafted, the City will identify the impediments and corresponding action items identified in the Regional Analysis of Impediments to Fair Housing Choice.

Discussion:

AP-85 Other Actions – 91.220(k)

Introduction:

In addition to addressing affordable housing and homelessness, the City will support community development activities to better address the vast needs of the community.

Actions planned to address obstacles to meeting underserved needs

The City's Consolidated Plan is targeted to address the needs of underserved populations. All activities included in the Annual Plan are targeted to address needs of the populations and communities by:

- Expanding the supply of affordable housing
- Improving the condition of housing for low- and moderate-income households
- Providing critical public services to low- and moderate-income households
- Improving infrastructure and public facilities in low- and moderate-income neighborhoods and areas

Actions planned to foster and maintain affordable housing

The City will use its HOME resources to expand the supply of affordable housing within the City. The City will use a share of its CDBG resources to improve the condition of owner-occupied units within the City. The City will continue to partner closely with the Housing Authority and leverage other federal, state, and local resources to expand the supply of affordable housing within the City of Oceanside.

Actions planned to reduce lead-based paint hazards

The City maintains an active outreach program to inform residents of lead hazards, and an inspection program to identify lead-based paint hazards as part of building and code inspection efforts, inspections related to City-funded rehabilitation loans, and visual inspection of properties under consideration by first-time homebuyers. All persons receiving CDBG, HOME or local funds for acquisition or rehabilitation of housing built before 1978, including rehabilitation of rental units, receive information on lead-based paint, whether or not a hazard has been detected. The City places a high priority on addressing lead-based paint hazards. Code Enforcement officers look for lead-based paint hazards as part of ongoing code enforcement and inspection activities. Building Department inspectors are alert to rental units of such age that the units may contain lead-based paint and will inform tenants and property owners as part of their inspections of the dangers of lead-based paint. The City distributes the brochures, "Lead Based Paint, a Threat" and "Protect Your Family from Lead in Your Home",

which are available in English and Spanish. The City Housing Quality Standards (HQS) inspectors for the Section 8 program, the Rehabilitation Specialist, and Section 8 Housing Specialists attend training on lead-based paint hazards. When Section 8 inspectors do initial or recertification inspections on units, they check first to determine the year the unit was constructed. If built prior to 1978 and the household has children under six years of age, the inspector must confirm that there are no loose paint chips or peeling paint anywhere in the unit. If the inspector does find peeling paint or chips, the unit must be inspected for lead-based paint before it can be approved for use by a household with a Section 8 Housing Choice Voucher.

Actions planned to reduce the number of poverty-level families

The City's antipoverty strategy of providing safe, affordable housing and critical public services will assist in reducing the number of poverty level families in Oceanside. By providing safe, affordable housing for those on a limited income, those families will be able to live in an environment where no more than 30% of their limited income is spent on housing. In addition, the City provides programs (e.g. after school, computer labs, budgeting and language classes) to assist residents in excelling in both school and the work environment.

Actions planned to develop institutional structure

The City of Oceanside collaborated with regional and local stakeholders focused on improving housing and community development conditions in the city and north county region. The working relationships between these organizations are strong and facilitative. During the coming year, the City will continue to strive to identify new partners as well as new financial and in-kind resources that can be leveraged by the City and/or its partners to better promote community development programming throughout the City.

Actions planned to enhance coordination between public and private housing and social service agencies

The City's Neighborhood Services Department works closely with other City departments and the community to develop programs and activities that improve low- and moderate-income neighborhoods throughout City. The administration of program activities includes housing, public facility and infrastructure improvements, public and social service activities and economic development activities. Additionally, the City is an active participant in regional council of governments to identify regional needs and corresponding strategies. The City works closely with a range of stakeholders and partners implementing housing and community development programs to ensure ongoing collaboration and coordination in program delivery.

Discussion:

See summary of other actions above.

Program Specific Requirements

AP-90 Program Specific Requirements – 91.220(I)(1,2,4)

Introduction:

Summary of program specific requirements below.

Community Development Block Grant Program (CDBG)

Reference 24 CFR 91.220(I)(1)

Projects planned with all CDBG funds expected to be available during the year are identified in the Projects Table. The following identifies program income that is available for use that is included in projects to be carried out.

1. The total amount of program income that will have been received before the start of the next program year and that has not yet been reprogrammed	0
2. The amount of proceeds from section 108 loan guarantees that will be used during the year to address the priority needs and specific objectives identified in the grantee's strategic plan	0
3. The amount of surplus funds from urban renewal settlements	0
4. The amount of any grant funds returned to the line of credit for which the planned use has not been included in a prior statement or plan.	0
5. The amount of income from float-funded activities	0
Total Program Income	0

Other CDBG Requirements

1. The amount of urgent need activities	0
---	---

HOME Investment Partnership Program (HOME)

Reference 24 CFR 91.220(I)(2)

1. A description of other forms of investment being used beyond those identified in Section 92.205 is as follows:
The City will not use any other forms of investment beyond those identified in Section 92.205.
2. A description of the guidelines that will be used for resale or recapture of HOME funds when used for homebuyer activities as required in 92.254, is as follows:
Repaid HOME loans are returned (recaptured) as program income to the City's HOME program. The City has chosen the "Recapture entire amount" option for recapture requirements on HOME loans (CFR §92.254a.5.ii.A.1.), which states, "the participating jurisdictions may recapture the entire amount of the HOME investment from the homeowner." When recapture provisions are triggered by a sale (voluntary or involuntary) of the housing unit and the net proceeds are insufficient to repay the HOME investment due, the City can only recapture the net proceeds available from the sale of the property and not from the homeowner's non-housing assets.

3. A description of the guidelines for resale or recapture that ensures the affordability of units acquired with HOME funds? See 24 CFR 92.254(a)(4) are as follows:
For all HOME assisted rental housing, the City of Oceanside ensures that assisted development during the period of affordability, performs on-site inspections of HOME-assisted rental housing to determine compliance with the property standards of § 92.251 and to verify the information submitted by the owners in accordance with the requirements of § 92.252 no less than: every three years for projects containing 1 to 4 units; every two years for projects containing 5 to 25 units; and every year for projects containing 26 or more units. Inspections must be based on a sufficient sample of units.
4. Plans for using HOME funds to refinance existing debt secured by multifamily housing that is rehabilitated with HOME funds along with a description of the refinancing guidelines required that will be used under 24 CFR 92.206(b), are as follows:
The City does not use HOME funds to refinance existing debt on properties being rehabilitated with HOME funds.
5. If applicable to a planned HOME TBRA activity, a description of the preference for persons with special needs or disabilities. (See 24 CFR 92.209(c)(2)(i) and CFR 91.220(l)(2)(vii)). `<TYPE=[text] REPORT_GUID=[A0BBB986408D8C25582AC4BE59FA99C5]>`
The TBRA program does not have any identified preference policies.
6. If applicable to a planned HOME TBRA activity, a description of how the preference for a specific category of individuals with disabilities (e.g. persons with HIV/AIDS or chronic mental illness) will narrow the gap in benefits and the preference is needed to narrow the gap in benefits and services received by such persons. (See 24 CFR 92.209(c)(2)(ii) and 91.220(l)(2)(vii)).
N/A
7. If applicable, a description of any preference or limitation for rental housing projects. (See 24 CFR 92.253(d)(3) and CFR 91.220(l)(2)(vii)). Note: Preferences cannot be administered in a manner that limits the opportunities of persons on any basis prohibited by the laws listed under 24 CFR 5.105(a).
N/A

Appendix - Alternate/Local Data Sources

1	Data Source Name 2024 Point in Time Count
---	---

	<p>List the name of the organization or individual who originated the data set.</p> <p>San Diego County</p>
	<p>Provide a brief summary of the data set.</p> <p>2019 Point-in-Time Count covers homeless housing stock.</p>
	<p>What was the purpose for developing this data set?</p> <p>To coordinate public services to meet homeless needs.</p>
	<p>Provide the year (and optionally month, or month and day) for when the data was collected.</p> <p>Data set was completed in 2019.</p>
	<p>Briefly describe the methodology for the data collection.</p> <p>Homeless count data was collected by San Diego County's Regional Task Force.</p>
	<p>Describe the total population from which the sample was taken.</p> <p>The population of San Diego County.</p>
	<p>Describe the demographics of the respondents or characteristics of the unit of measure, and the number of respondents or units surveyed.</p> <p>The results covers unsheltered and sheltered homeless individuals.</p>
2	<p>Data Source Name</p> <p>2019 Homeless Inventory Count</p>
	<p>List the name of the organization or individual who originated the data set.</p> <p>San Diego County CoC</p>
	<p>Provide a brief summary of the data set.</p> <p>This covers homeless housing inventory count as of 2019.</p>
	<p>What was the purpose for developing this data set?</p> <p>For HUD requirements.</p>
	<p>How comprehensive is the coverage of this administrative data? Is data collection concentrated in one geographic area or among a certain population?</p> <p>It covers San Diego County.</p>
	<p>What time period (provide the year, and optionally month, or month and day) is covered by this data set?</p> <p>Data set was completed in the year 2019.</p>
	<p>What is the status of the data set (complete, in progress, or planned)?</p> <p>Data set is complete.</p>
